

Acknowledgements

I have travelled a long distance to reach at this stage of my thesis since 2012. The path was not very smooth for me. But I met several wonderful persons on this journey who made cherishable memories for my old age, enriched my experience and contributed to the accomplishment of my thesis. I would like to take the opportunity to convey my sincere thanks to all of them.

This work was carried out at High Energy & Cosmic Ray Research Centre, University of North Bengal and Inter-University Centre for Astronomy and Astrophysics (IUCAA), Pune, India with the financial grant from the IUCAA and Infosys Foundation.

First and foremost, I would like to record my sincere gratitude to my thesis supervisors Dr. Arunava Bhadra and Prof. A. N. Ramaprakash for their extensive academic teaching and guidance to carry out my research work. I am extremely thankful for their patience and support throughout this research and the writing of my thesis. Without their constant support, it would not be possible to reach this moment.

I am highly thankful to Dr. Arunava Bhadra, for teaching me the basics of Astronomy, Cosmology. He gave me time to time PhD work-related advice and help in troubleshooting. He had a lot of patience and throughout kind to bear with my ignorance and kept my spirits high. I am greatly thankful to Prof. A. N. Ramaprakash for encouraging me in the active scientific research in the Adaptive Optics instrumentation, experiments and for shaping me. He has been an inspiration to me. I sincerely acknowledge him who guided in my bad as well as good time. I got complete freedom from my supervisors, which is very important to build the self-confidence. But freedom comes with huge responsibility also, I believe that I have carried out that as a result, the laser guide star is actually formed in our sky and the AO system is installed on IUCAA 2 m telescope for the first time in our country.

I am deeply indebted to Dr. Hillol Kanti Das, who has been a good teacher to me in the laboratory. I thank him for all the lessons of instrumentation skills. I got the best experience from him. We experienced together all the ups and downs of routine work, the shared happiness of success and the depression of failure. I sincerely thank Dr. Samir Sarkar and Mr. Arindam Mukherjee for teaching all the

life-saving topics in research spherical astronomy, IRAF and C programming etc. I sincerely thank all the faculty and staff members of the Department of Physics, University of North Bengal.

All present and former colleagues and visiting members of the HECRRC - Dr. Subhranshu Ghosh, Dr. Biplab Bijay, Dr. Tamal Sarkar, Dr. Prabir Banik, Mr. Sadhan Paul and all others, for their assistance and providing an excellent working atmosphere to me.

The author acknowledges to all the team members of IUCAA Instrumentation - Dr. Hillol Kanti Das, Mr. Mahesh P. Burse, Mr. Pravinkumar A. Chordia, Mr. Pravin Khodade, Mr. Abhay Kohok, Mrs. Deepa Modi, Mr. Sujit P. Punnadi, Mr. Chaitanya V. Rajarshi, Mr. Chikku Shekhar, Mr. Vilash Mistry, Mrs. Rani Bhandre, Mr. Bhushan Joshi, Mr. Kalpesh, Mrs. Parvathi S Pillai, Mr. Chikku Shekher, Mr. Gaurav Datir, Mr. Mandar Hulsurkar, Mr. Swapnil Prabhudesai who played a pivot role in the completion of the instrument- iRobo-AO. I convey my deep thank to IGO staff members - Mr. Dilip Pacharne, Mr. Jagan Borhade, Mr. Pratapbhan Singh Senger, Mr. Pravin Pacharne, Mr. Ramu Pande for helping me a lot during the commissioning of iRobo-AO. It is my pleasure to work and communicate with such energetic, efficient and talented team members. My lab mates Chaitanya, Pravin and Deepa who extended their cooperation and made me one of them. Thanks also to Mr. Pravin Khodade and Mr. Abhay Kohak for their CAD drawings, that appear in this thesis.

I take the opportunity to thank Prof. Kulkarni (Caltech) for the Caltech visit. It was an opportunity to learn Lucky imaging and gaining an observation experience with Robo-AO along with its operation at Kitt-Peak national observatory. He pushed me for wrapping up the thesis. I am extremely thankful to Prof. Christoph Baranec (U. Hawai'i), the architect of Robo-AO for his foolproof tips, kind suggestions and supports. I am highly thankful to Dr. Reed Riddle (Caltech) for his Robo-AO entire code which we have adapted for iRobo-AO. I am very thankful to Prof. Nicholas Law (UNC Chapel Hill) and Dr. Dmitry Duev (Caltech) for the Lucky imaging software. I am thankful to Shriharsh for his thesis, which helped me a lot to understand Robo-AO.

I would like to express my deep gratitude to Dr. Narendra Nath Patra, Dr. Kausubh Waghmare, and Mr. Ajay Vibhute for their generous help in coding. I deeply acknowledge Mr. Ajay Lokhande and his team of "Accurate Engineering" for all

the mechanical support. I am very grateful to the mechanical workshop of NCRA, Pune and MGK Menon laboratory of IIA, Bangalore.

I am thankful to all my teachers from my primary class to MTech for mentoring me. I thank administrative, library and computer staff of University of North Bengal and IUCAA for their timely help and maintenance of their respective facilities.

This journey would not be memorable without my friends. Debansu Roy, a senior brother from my RKMRC Narendrapur and my trekking guru (first trekking, Vellarimala in Kozhikode) who pushed me a lot during my M.Tech to pursue good research. I would like to thank Prasun Dutta and his company for organizing several treks in the western ghat, which recharged me a lot being in touch with nature and help me to be patient in research. I would like to thank Kanan Dutta, Narendra Nath Patra, Samir Choudhuri, Ragunath Ghora who made my life cheerful during the evening walk, cooking and science discussion sessions, which I can't forget. The most memorable events in IUCAA is the annual drama rehearsal sessions and very much thankful to Soumen Bala, Debajyoti Sarkar, Preetish Kumar Mishra, Avishek Basu and all the team members. I have been encouraged, sustained, inspired and tolerated by my learned seniors, colleagues and great friends - Anirban Ghosh, Anirban Pal, Anirban Das, Amitava, Amit, Akshay, A. Narsi, Avinash, Biplab, Chandi, Debdutta, Samir, Sarathi, Samiran, Sajal, Sabyasachi, Sorabh, Sayan, Aman, Rajiv, Raghunath, Kabir, Madhusudan, Naren, Gunjan, Niladri, Nikhil, Prashanta Char and Prashanta Pathak, Prakash, Prasun, Prabir, Partha, Ravi, Shreeram without them, the thesis could not be completed. I have deep regards to Dr Prakash Sarkar for being such a lovely person and helping in the early days of my research. I thank to Dr. Rupak Roy for teaching me IRAF. I thank to Narendra Nath Patra and Sarathi Roy, my good friends, for their continuous support. I am thankful to Prof. Subhashis Roy (NCRA) for his constant push to finish my thesis. I sincerely thank Dr. Jayashree Roy, who continuously supported and guided me in my ups and downs throughout my PhD.

I deeply thank my uncle, late Dr B. Ghosh and aunt Mrs Ghosh, for their support. I sincerely thank my uncle Mr. Satyanarayan Roy for inspiring me for higher education. I express my deepest thank to my eldest brother and my backbone Mr. Pratap Kumar Pal for his constant guide and care. Very special thanks to my youngest sister Miss Bratati Pal for being my strength for accomplishing first step of my research. I sincerely thank my elder brother Mr. Aditya Kumar Paul who

mentored me in my childhood and supported my curiosity for science and technology. I want to convey my sincere heartfelt thanks to my parents and my siblings, who made me what I am today. I want to dedicate my thesis to my grandmother Late Mrs Radharani Paul who was my first friend-philosopher and guide and one of my younger lovely cousins Late Swanwit Roy, who left us in very odd time was a very bright and talented person.

I am thankful to my thesis referees in advance for reading and giving their valuable feedbacks, suggestions and comments on my work.

Date: ~~..~~^{29th} August 2019

Jyotirmay Paul
