

LIST OF TABLES

Sl. No.	Title	Page No.
1.	Table 2.1: Kuppaswami socio-economic scale proposed by Mishra and Singh (2003) and Kumar et al. (2007)	39
2.	Table 2.2: Table showing the results of Technical Errors of measurement of the anthropometric measurements recorded in the present study	44
3.	Table 2.3: World Health Organization cut-off points and risk of metabolic complications	48
4.	Table 2.4: Classification of assessing severity of public health problem of undernutrition based on the percentages among the children.	54
5.	Table 2.5: Recommended anthropometric measures/indices used to assess the prevalence of undernutrition status	54
6.	Table 2.6: Proposed classification of BMI in Asian Adults (WHO 2004)	55
7.	Table 3.1: Demographic, socio-economic profile and lifestyle related factors of Bengali Muslim children	70
8.	Table 3.2: Descriptive statistics (mean \pm SD) of age Bengali Muslim children and anthropometric variables of	74
9.	Table 3.3: Descriptive statistics (mean \pm SD) of sex specific anthropometric variables of Bengali Muslim children	75
10.	Table 3.4: Descriptive statistics (mean \pm SD) of the derived anthropometric indices relating to body composition and nutritional status of Bengali Muslim children	78

11.	Table 3.5: Age and sex specific descriptive statistics (mean \pm SD) of anthropometric indices relating to body composition and nutritional status of Bengali Muslim children	79
12.	Table 3.6: Pearson Correlation Coefficient between the anthropometric variables among Bengali Muslim boys	82
13.	Table 3.7: Pearson Correlation Coefficient between the anthropometric variables among Bengali Muslim girls	84
14.	Table 3.8: Age-sex specific descriptive statistics of conventional anthropometric measures among Bengali Muslim children	90
15.	Table 3.9: Age-gender specific prevalence of overall undernutrition among the Bengali Muslim children	91
16.	Table 3.10: Age-sex specific prevalence of moderate and severe undernutrition among the Bengali Muslim boys	92
17.	Table 3.11: Age-gender specific prevalence of Moderate and severe undernutrition among the Bengali Muslim girls	93
18.	Table 3.12: Sex differences in the prevalence of overall and age and sex specific prevalence of overall undernutrition among Bengali Muslim boys and girls	94
19.	Table 3.13: Sex differences in the prevalence of overall and age and sex specific prevalence of different grades (moderate and severe) of undernutrition among Bengali Muslim boys and girls	95
20.	Table 3.14: Descriptive statistics (mean \pm SD) of age and sex specific anthropometric variables of Bengali Muslim mothers	97

21.	Table 3.15: Descriptive statistics (mean \pm SD) of the derived anthropometric indices relating to body composition and nutritional status of mothers	99
22.	Table 3.16: Pearson Correlation Coefficient between the Anthropometric Variables of mothers	101
23.	Table 3.17: Linear regression analyses of age on the different anthropometric and body composition variables among the Bengali Muslim mothers	105
24.	Table 3.18: Linear regression analyses of BMI on the different anthropometric and body composition variables among the Bengali Muslim mothers	107
25.	Table 3.19: Nutritional status of the Bengali Muslim mothers based on internationally accepted cut-offs of BMI for Asian Indians (WHO 2004)	109
26.	Table 3.20: Assessment of undernutrition among the Bengali Muslim mothers using BMI vs. MUAC	111
27.	Table 3.21: Prevalence of overweight, obesity and adiposity among the Bengali Muslim mothers using WC, WHR, WHtR, PBF and Σ 4SKF	113
28.	Table 3.22: Age-specific prevalence of overweight, obesity and adiposity among the Bengali Muslim mothers using WC, WHR, WHtR, PBF and Σ 4SKF	114
29.	Table 3.23: Assessment of overweight-obesity and excess adiposity among the Bengali Muslim mothers using BMI vs. WC, WHR, WHtR, PBF and Σ 4SKF	115
30.	Table 3.24: Age specific assessment of overweight-obesity and excess adiposity among the Bengali Muslim mothers using BMI vs. WC, WHR, WHtR, PBF and Σ 4SKF	116

31.	Table 3.25: Linear regression analysis of maternal BMI with child HAZ, WAZ, WHA, BMIAZ and HdCAZ	118
32.	Table 3.26: Linear regression analysis of maternal MUAC with child HAZ, WAZ, WHA, BMIAZ and HdCAZ	118
33.	Table 3.27: Linear regression analysis of Maternal BMI and MUAC with child HAZ, WAZ, WHA, BMIAZ and HdCAZ	119
34.	Table 3.28: Age specific descriptive statistics of HAZ, WAZ, WHZ, BMIAZ and HdCAZ of the children of undernourished mothers	120
35.	Table 3.29: Age specific descriptive statistics of HAZ, WAZ, WHZ, BMIAZ and HdCAZ of the children of overweight mothers	121
36.	Table 3.30: Age specific descriptive statistics of HAZ, WAZ, WHZ, BMIAZ and HdCAZ of the children of obese mothers	121
37.	Table 3.31: Binary logistic regression analysis and associate risk factors in the prevalence of stunting and thinness and demographic variables among children with socio-economic	126
38.	Table 3.32: Binary logistic regression analysis and associate risk factors in prevalence of wasting, underweight and low HdC-for -age with socio-economic and demographic variables among children	129
39.	Table 3.33: Multinomial logistic regression analysis and associate risk factors in prevalence of undernutrition, overweight, obesity socio- economic and demographic variables among Bengali Muslim mothers	136

40.	Table 4.1: Comparison of prevalence of undernutrition among the Bengali Muslim children with the other Indian studies	166
41.	Table 4.2: Comparison of prevalence of undernutrition among the Bengali Muslim children with non-Indian studies	173
42.	Table 4.3: Comparison of the prevalence of undernutrition among the Bengali Muslim mothers in present study with other Indian studies	185
43.	Table 4.4: Comparison of the prevalence of undernutrition among the Bengali Muslim mothers in present study with other non-Indian studies	189
44.	Table 4.5: Comparison of the prevalence of overweight, obesity and overall overweight-obesity among the Bengali Muslim mothers in present study with other Indian studies	197
45.	Table 4.6: Comparison of the prevalence of overweight, obesity and overall overweight-obesity among the Bengali Muslim mothers in present study with other non-Indian studies	202
