

## LIST OF TABLES

---

<b>Serial no.</b>	<b>Legends</b>	<b>Page No.</b>
Table 3.1	Environmental parameters and its associated variables used in the study and their percentage contribution to the prediction present Species Distribution Model (SDM) developed for potential habitat of Blood Pheasant in the Himalayas	54-54
Table 3.2	Environmental parameters and its associated variables used in the study and their percentage contribution to the prediction present Species Distribution Model (SDM) developed for potential habitat of Himalayan Monal in the Himalayas	57-57
Table 3.3	Environmental parameters and its associated variables used in the study and their percentage contribution to the prediction present Species Distribution Model (SDM) developed for potential habitat of Kalij Pheasant in the Himalayas	59-59
Table 3.4	Environmental parameters and its associated variables used in the study and their percentage contribution to the prediction present Species Distribution Model (SDM) developed for potential habitat of Satyr Tragopan in the Himalayas	62-62
Table 4.1	List of woody species found along the transect (Yuksom-Black Kabru Dome transect)	74-76
Table 4.2	List of woody species found along the transect (Tholung- Kisong transect)	88-90
Table 4.3	Pearson correlation of woody species richness vs. climatic variables and altitude for study sites	
Table 5.1	Details of sightings of the Himalayan Pheasants in the Khangchendzonga Biosphere Reserve	112-112
Table 5.2	Details of encounter male, female, and chick of the Himalayan Pheasants in the Khangchendzonga Biosphere Reserve	112-112
Table 5.3	Abundance estimation of the Himalayan Pheasant based on Distance sampling in Khangchendzonga Biosphere Reserve during the study period (2014-2017)	113-113
Table 5.4	Detection probability, density and cluster size in different seasons and detection probability of the Blood pheasant in the Khangchendzonga BR during the study period (2014-2017)	115-115
Table 5.5	Detection probability, density and effective strip width of the Blood Pheasant in different major forest types of the Khangchendzonga Biosphere Reserve, 2014 – 2017	116-116

## List of Tables

---

Table 5.6	Density, cluster size, range of cluster size in different seasons and detection probability of the Himalayan Monal in the Khangchendzonga BR during the study period (2014-2017)	117-117
Table 5.7	Detection probability, density and effective strip width of the Himalayan Monal in different major forest types of the Khangchendzonga Biosphere Reserve, 2014 – 2017	118-118
Table 6.1	Predicting dynamic changes in suitable habitat area for Blood Pheasant in the Eastern Himalayas under different future climate scenario/year combination	161-161
Table 6.2	Predicting dynamic changes in suitable habitat area for Himalayan Monal in the Eastern Himalayas under different future climate scenario/year combination	163-163
Table 6.3	Predicting dynamic changes in suitable habitat area for Kalij Pheasant in the Eastern Himalayas under different future climate scenario/year combination	165-165
Table 6.4	Predicting dynamic changes in suitable habitat area for Satyr Tragopan in the Eastern Himalayas under different future climate scenario/year combination	167-167
Table 6.5	Predicting dynamic changes in suitable habitat area for Blood Pheasant in the Sikkim Himalayas under different future climate scenario/year combination	169-169
Table 6.6	Predicting dynamic changes in suitable habitat area for Himalayan Monal in the Sikkim Himalayas under different future climate scenario/year combination	171-171
Table 6.7	Predicting dynamic changes in suitable habitat area for Kalij Pheasant in the Sikkim Himalayas under different future climate scenario/year combination	173-173
Table 6.8	Predicting dynamic changes in suitable habitat area for Satyr Tragopan in the Sikkim Himalaya under different future climate scenario/year combination	175-175
Table 6.9	Predicting dynamic changes in suitable habitat area for Blood Pheasant in the Khangchendzonga Biosphere Reserve under different future climate scenario/year combination	177-177

## List of Tables

---

Table 6.10	Predicting dynamic changes in suitable habitat area for Himalayan Monal in the Khangchendzonga Biosphere Reserve under different future climate scenario/year combination	179-179
Table 6.11	Predicting dynamic changes in suitable habitat area for Kalij Pheasant in the Khangchendzonga Biosphere Reserve under different future climate scenario/year combination	181-181
Table 6.12	Predicting dynamic changes in suitable habitat area for Satyr Tragopan in the Khangchendzonga Biosphere Reserve under different future climate scenario/year combination	184-184
Table 6.13	Descriptive statistic for the explanatory variables of the questionnaire	210-210
Table 6.14	KMO and Bartlett's Test for the explanatory variables of the questionnaire	211-211
Table 6.15	Reliability statistics for the explanatory variables of the questionnaire	211-211
Table 6.16	Total variance explained the explanatory variables of the questionnaire	212-212
Table 6.17a	Linear regression for the explanatory variables of the questionnaire	213-213
Table 6.17b	Linear regression for the explanatory variables of the questionnaire	213-213
