

## LIST OF SCHEMES

### CHAPTER-I

	<b>Page no</b>
Scheme I.1. The Glaser coupling	3
Scheme I.2. Baeyer's synthesis of indigo	3
Scheme I.3. The Ullmann reaction	4
Scheme I.4. Sodium-mediated dimerization of alkyl and aryl halides	4
Scheme I.5. Chromium chloride promoted dimerization of Grignard reagents	5
Scheme I.6. The first examples of catalysis in couplings for C-C bond formation: Meerwein and Kharasch couplings.	6
Scheme I.7. The Cadiot-Chodkiewicz and the Castro-Stephens reactions	8
Scheme I.8. General scheme of Mizoroki-Heck reaction	9
Scheme I.9. General scheme of Sonogashira Reaction	10
Scheme I.10. General scheme of Negishi Reaction	10
Scheme I.11. General scheme of Stille Reaction	11
Scheme I.12. General scheme of Suzuki Reaction	12
Scheme I.13. General scheme of Buchwald-Hartwig Amination Reaction	12
Scheme I.14. General scheme of Direct C-H Arylation Reaction	13
Scheme I.15. General scheme of Directing group (DG) mediated arylation reaction	14
Scheme I.16. Mizoroki-Heck reaction on the way to SB273005	17
Scheme I.17. Mizoroki-Heck reaction with Ethylene	17
Scheme I.18. Phosphine-free Heck coupling towards synthesis of hepatitis C polymerase inhibitor (39)	18
Scheme I.19. Mizoroki-Heck route to oncology candidate CP-724,714 (43)	18
Scheme I.20. Synthesis of Enduracil via Sonogashira coupling	19
Scheme I.21. Sonogashira coupling in the manufacture of farnesyl transferase inhibitor, 49	20
Scheme I.22. Large-scale reaction cascade to give ABT-239 intermediate, 52	20
Scheme I.23. Negishi coupling in the large-scale production of PDE472, 56	21
Scheme I.24. Scheme for total synthesis of rapamycin, 60	22
Scheme I.25. Suzuki-Miyaura reaction used in the synthesis of Losartan, 64	22

Scheme I.26. Suzuki–Miyaura reaction used in key intermediate synthesis of OSU 6162	23
Scheme I.27. Pfizer’s route to CI-1034 using Suzuki–Miyaura reaction	23
Scheme I.28. Synthesis of key intermediate of a selective NPY-5 receptor antagonist using Suzuki–Miyaura reaction	24
Scheme I.29. Synthesis of kinase inhibitor using Suzuki–Miyaura reaction	24
Scheme I.30. Suzuki benzylation towards synthesis of a precursor to potential HIV drugs and blood pressure modulation agents, 87	25
Scheme I.31. Application of the Suzuki reaction towards the synthesis of Etalocib	26
Scheme I.32. Large-scale Buchwald–Hartwig amination yielding precursor, 95	27
Scheme I.33. Coupling of 4-chlorotoluene with hydrazone (99)	27
Scheme I.34. Small-scale synthesis of fedratinib via. Buchwald-Hartwig amination reaction according to TargeGen Inc.	28
Scheme I.35. Pfizer’s Migita protocol for the synthesis of 109	29
Scheme I.36. Medicinal chemistry route to alpelisib, 123	30
Scheme I.37. Preparation of tetra-ortho-substituted and functionalized biaryls	39
Scheme I.38. Reactivity of 146 in the Suzuki–Miyaura coupling of tetra-ortho-substituted Biaryls	41
Scheme I.39. Preparation of tetra-ortho-substituted biaryls using [Pd(IPr*)(cin)Cl] (147)	42
Scheme I.40. Preparation of (a) tetra-ortho-substituted biaryls and (b) polyaryl benzenes using 145	42
Scheme I.41. Pd-NHC-Catalyzed Suzuki–Miyaura Cross-Coupling of Amides	43
Scheme I.42. Heck reaction with heteroleptic Pd(II) complex	44
Scheme I.43. Sonogashira reaction catalyzed by Batey’s Pd-NHC complex (153)	46
Scheme I.44. Sonogashira reaction in air under amine-free conditions	47
Scheme I.45. Pd–NHC-Catalyzed Direct C–H Arylation of Furans, Thiophenes, and Thiazoles by Özdemir	48
Scheme I.46. Pd–NHC-Catalyzed Direct C–H Arylation of Furans, Thiophenes, and Thiazoles by Akkoc	49

Scheme I.47.	Pd–NHC-Catalyzed Direct C–H Arylation of Benzoxazoles by Yang	50
Scheme I.48.	Pd–NHC-Catalyzed Direct C–H Arylation of Benzoxazoles by Gandhi	51
Scheme I.49.	Direct C(sp <sup>2</sup> )–H arylation using Bis(imino)acenaphthene Pd–NHC complex	52
Scheme I.50.	Pd-Catalyzed C(sp <sup>2</sup> )–H and C(sp <sup>3</sup> )–H Arylation Assisted by an 8-AQ Auxiliary (Daugulis, 2005)	53
Scheme I.51.	C(sp <sup>2</sup> )–H Arylation Assisted by an 8-AQ Auxiliary	54
Scheme I.52.	C(sp <sup>3</sup> )–H Arylation of Amino Acid Derivatives Assisted by an 8-AQ Auxiliary	55
Scheme I.53.	C(sp <sup>3</sup> )–H Arylation of Aliphatic Heterocyclic Amides Assisted by an 8-AQ Auxiliary	56

## CHAPTER-II

Scheme II.1.	Synthesis of Benzimidazole based ionic liquids	60
Scheme II.2.	Scheme for synthesis of Benzimidazole based Pd-NHC complex	61
Scheme II.3.	Substrate scope of various aryl bromides in the Pd-NHC catalyzed C-H arylation	63
Scheme II.4.	Substrate scope of various benzoxazoles in the Pd-NHC catalyzed C-H arylation	64
Scheme II.5.	Substrate scope of Pd-NHC catalyzed Carbonylative Suzuki coupling	67
Scheme II.6.	Substrate scope in Pd-NHC catalyzed Carbonylative Sonogashira coupling	70
Scheme II.7.	Substrate scope in Heck cross-coupling reaction	72
Scheme II.8.	Substrate scope in the Pd-NHC catalyzed one-pot annulation	73

## CHAPTER-III

Scheme-III.1.	Palladium Catalyzed Chelation Assisted Regioselective C(sp <sup>2</sup> )-H Arylation Promoted by a Removable, Bidentate Auxiliary	99
Scheme-III.2.	Substrate Scope of various (Het)Aryl Iodides in the 8-AIP (AminoImidazo[1,2- <i>a</i> ]Pyridine) Directed $\beta$ -C(sp <sup>2</sup> )-H Arylation	103
Scheme-III.3.	Substrate Scope of Various Acrylamide in the AIP (AminoImidazo [1,2- <i>a</i> ]Pyridine) Directed $\beta$ -C(sp <sup>2</sup> )-H arylation	104

Scheme-III.4. Upscale reaction	105
Scheme-III.5. Removal of Auxiliary (8-AIP)	105
Scheme-III.6. Mechanistic studies	106
Scheme-III.7. Plausible Catalytic Cycle	107

#### CHAPTER-IV

Scheme-IV.1. 8-AIP Directed Regioselective <i>ortho</i> -C(sp <sup>2</sup> )-H and $\beta$ -Arylation in Water	135
Scheme-IV.2. Scope of various iodoarenes in the Pd(II)catalyzed <i>ortho</i> C(sp <sup>2</sup> )-H-arylation in water using 8-AIP	139
Scheme-IV.3. Scope of various arylacetamide derivatives in the Pd(II) catalyzed <i>ortho</i> C(sp <sup>2</sup> -H)-arylation in water using 8-AIP	140
Scheme-IV.4. Scope of various (het)aryl iodides and amide derivatives in the Pd(II) catalyzed $\beta$ and C-3-arylation in water using 8-AIP	141
Scheme-IV.5. Mechanistic studies	143
Scheme-IV.6. Plausible mechanism	144
Scheme-IV.7. Application	145
