

## TABLE OF CONTENTS

Topic	Page No.
Abstract	i-ii
Preface	iii
Acknowledgement	iv
Content	v-x
List of Tables	x-xii
List of Figures	xii-xvi
List of Appendices	xvii
<b>CHAPTER I: Introduction</b>	<b>1-32</b>
1.1. Biologically active molecule and living organism	1
1.2. Technique for study the different types of interaction	1-3
1.3. Amino acid building block of the protein	3-4
1.3.1. Types of amino acid and their need for living body	4-6
1.4. Necessity of Drug in sustain the lives	6
1.4.1. Classification of drugs	6-7
1.4.2. Drug interaction with biologically active molecules	7-8
1.5. Enzymes as biologically active substances	9
1.6. Vitamins and their importance for sustainable lives	10-11
1.7. The function of nucleic acid and its importance	11
1.7.1. Structure of nucleic acid	11-12
1.8. Carbohydrates and key role the as bioactive molecule	12
1.9. Role and effects of Solvent on the physiochemical processes	12-14
1.10. Solvation consequences of solute molecules	14-15
1.10.1. Preferential Solvation in solvent mixture	15-16
1.11. Ion-Solvent or Solute-Solvent Interaction takes place in salvation process	16-17
1.12. Ion-Ion or Solute-Solute Interaction in solution	17-18
1.13. Objective and application of the Research work	18-20
1.14. Significance and span of the Physico-Chemical Parameters	20-21
1.15. Vital role of Solutes and Solvents used	22
1.15.1 Solutes and cosolutes	22-23

<b>Topic</b>	<b>Page No.</b>
1.16 solvents	23-24
1.17. Activity of water as a solvent	24-25
1.18. Method of Investigation	25-26
References	26-32
<b>CHAPTER II: Theoretical Background</b>	<b>33-74</b>
Physico-Chemical Parameters Studied in Solution Chemistry	33
2.1. Density measurement	34
2.1.1. Partial Molar Volumes calculation	35-37
2.1.2. Apparent Molar Volume	37-40
2.1.3. Ionic Partial Molar Volume	40-42
2.1.4. Standard Partial Molar Volume of Transfer	42-44
2.1.5. Apparent Molar Expansibility	44-45
2.1.6. Standard Partial Molar Expansibility	45-46
2.1.7. Ionic Partial Molar Expansibility	46-47
2.1.8. Apparent specific volumes and taste quality	47
2.2. Viscosity	47
2.2.1. Viscosity of Electrolyte Solution	47-50
2.2.2. Ionic Viscosity $B$ –Coefficients	50-52
2.2.3. Temperature Dependence of Ionic Viscosity $B$ – Coefficients	52-55
2.2.4. Viscosity of Non-Electrolyte Solutions	55
2.2.5. Viscosity $B$ -Coefficient of Transfer	55-56
2.2.6. Viscous flow causing the change in the shape and size	56-57
2.2.7. Viscosity and its thermodynamic character	57-60
2.2.8. Solvation Number	60-61
2.3. Ultrasonic Speed measurement for acoustic property	61
2.3.1. Apparent Molal Adiabatic Compressibility	61-62
2.4. Refractive Index	62-64
2.5. Study of UV-Visible Spectra for solvent effect in solution	64-65
2.6. Theoretical Approach	65
2.6.1. Molecular Theory for Partial Molar Volume	65-66
2.6.2. Solvation Models	67-68

<b>Topic</b>	<b>Page No.</b>
References	68-74
<b>CHAPTER III: Experimental Section</b>	<b>75-89</b>
3.1. Details of the Chemicals used	75
3.1.1. Solvents	75-77
3.1.2. Solutes	77
3.2. Experimental Methods	78
3.2.1. Mass measurement	78
3.2.2. Density measurement	78-80
3.2.3. Viscosity measurement	81
3.2.4. Refractive index measurement	81-82
3.2.5. Spectrophotometric measurements	82-84
3.2.6. Ultrasonic velocity measurements	85-87
3.2.7. pH Measurements	87-88
References	88-89
<b>CHAPTER IV:</b>	
<b>Physico-chemical studies of L-Proline and L-leucine in aqueous Tetrabutyl Phosphonium <i>p</i>-Toluene Sulphonate solutions at 298.15, 303.15 and 308.15K probed by density, viscosity and refractive index measurements.</b>	<b>90-102</b>
4.1. Introduction	90-91
4.2. Experimental section	91
4.2.1. Source and purity of samples	91
4.2.2. Apparatus and Procedure	92
4.3. Results and discussion	97
4.3.1. Density calculation	97-99
4.3.2. Viscosity calculation	100
4.3.3. Refractive index calculation	100-101
4.4. Conclusion	101-102
References	102

<b>Topic</b>	<b>Page No.</b>
<b>CHAPTER V:</b>	
<b>Studies on the Solvation Consequences of Aqueous Solutions of Uracil on Paracetamol and Caffeine</b>	<b>103-130</b>
5.1. Introduction	103
5.2. Experimental Section	104
5.2.1. Chemicals used	104-105
5.2.2. Apparatus and procedure	105-106
5.3. Results and Discussion	106
5.3.1. Standard partial molar volumes	106-113
5.3.2. Apparent molar expansibilities	115-117
5.3.3. Standard transfer volumes	118-121
5.3.4. UV-Vis spectroscopy	121
5.3.5. Viscometric results	121-125
5.3.6. Thermodynamics of viscous flow	125-126
5.4. Conclusion	126-128
References	128-130
<b>CHAPTER VI:</b>	
<b>Probing Subsistence of Host Guest Inclusion Complexes of Oligosaccharides with Allopurinol for Regulatory Release with the Manifestation of Solvation Consequences</b>	<b>131-163</b>
6.1. Introduction	131-132
6.2. Experimental Section	132
6.2.1. Source and purity of materials	132
6.2.2. Apparatus and procedure	132
6.2.3. Preparation of Solid Inclusion Complex	133-134
6.3. Result and discussion	134
6.3.1. Job's plot	134
6.3.2. Determination of binding (or association) constant by UV-Vis spectroscopy	134-139
6.3.3. Fluorescence	139-142

<b>Topic</b>	<b>Page No.</b>
6.3.4. FTIR	143-145
6.3.5. <sup>1</sup> H NMR spectroscopy	146-148
6.3.6. 2D-ROESY spectroscopy	149-152
6.3.7. SEM	152-154
6.3.8. XRD (or PXRD – powdered x-ray diffraction spectroscopy)	154-156
6.3.9 ESI-MS	157-158
6.4. Biological activity	159
conclusion	160
Reference	160-163
<b>CHAPTER VII:</b>	
<b>Studies on the Solvation Consequences of N,N-dimethylformamide and Dimethyl sulphoxide on Salicylaldehyde anil zinc(II)</b>	<b>164-179</b>
7.1. Introduction	164
7.2. Experimental Section	165
7.2.1. Chemicals used	165
7.2.2. Apparatus and procedure	166-167
7.3. Results and Discussion	167
7.3.1. Apparent and partial molar volumes	167-170
7.3.2. Apparent molar expansibilities	170-175
7.3.3. Viscometric results	175-177
7.4. Conclusion	177-178
References	178-179
<b>CHAPTER VIII:</b>	
<b>CONCLUDING REMARKS</b>	<b>180-182</b>
<b>APPENDICES</b>	<b>183</b>
<b>BIBLIOGRAPHY</b>	<b>184-202</b>
<b>INDEX</b>	<b>203-207</b>
