TOPICS	Page No.
Abstract	i-ii
Preface	iii
Acknowledgement	iv-v
Table of Contents	vi-xii
List of Tables	xiii
List of Schemes	xiv
List of Figures	xv-xviii
List of Appendices	xix
CHAPTER-I: GENERAL INTRODUCTION	1-38
General Introduction	1-1
1.1. Coordination Chemistry	1-2
1.2. Biological significance of transition metals and their coordination compounds	2-4
1.2.1. Manganese	3-3
1.2.2. Cobalt	3-3
1.2.3. Nickel	3-4
1.2.4. Copper	4-4
1.2.5. Zinc	4-4
1.3. Schiff Bases and its complexes	5-6
1.4. Deoxyribonucleic Acid	6-8
1.5. Interaction of transition metal complexes with DNA	8-12
1.5.1. Modes of DNA interactions	9-12
1.5.1.1. Covalent interaction	10-11
1.5.1.2. Non-covalent interaction	11-12
1.6. DNA Cleavage	12-13
1.7. Antioxidant Activity	13-14
1.8. Antimicrobial studies	14-17

1.8.1. Antimicrobial activity of metal complexes	15-17
1.9. Molecular Docking	18-18
1.10. Literature Review	18-22
1.11. Objectives and scope of the present work	22-23
References	24-38
<hr/>	
CHAPTER-II: EXPERIMENTAL SECTION	39-56
<hr/>	
2.1. Chemicals and Reagents	39-41
2.2. Physico-chemical methods used to characterize synthesized Compounds	41-49
2.2.1. Elemental analysis	41-41
2.2.2. Thin layer chromatography	41-41
2.2.3. Magnetic susceptibility measurement	42-43
2.2.4. Infrared spectroscopy	43-43
2.2.5. Electronic spectroscopy	44-44
2.2.6. Nuclear Magnetic Resonance (NMR) spectroscopy (¹ H NMR and ¹³ C NMR)	44-44
2.2.7. ESI-MS	45-45
2.2.8. Conductivity	45-46
2.2.9. Mass measurements	46-46
2.3. DNA interaction study	47-49
2.3.1 Absorption study	47-47
2.3.2. Ethidium Bromide (EB) competitive study with fluorescence emission spectroscopy	47-48
2.3.3. Thermal denaturation study	48-48
2.3.4. Viscosity measurements	48-48
2.4. DNA cleavage study	49-49
2.5. Antioxidant and free radical scavenging activity study	49-52
2.5.1. DPPH radical scavenging assay	49-49
2.5.2. Hydroxyl radical scavenging assay	50-50

2.5.3. Superoxide radical scavenging assay	50-50
2.5.4. Nitric oxide (NO) radical scavenging assay	50-50
2.5.5. Hydrogen peroxide scavenging assay	50-50
2.5.6. Peroxynitrite scavenging activity	51-51
2.5.7. Singlet oxygen scavenging assay	51-51
2.5.8. Hypochlorous acid scavenging assay	51-51
2.5.9. Measurement of reducing power	51-51
2.5.10. Iron chelation assay	51-51
2.5.11. Total antioxidant activity (TAA)	51-52
2.5.12. Lipid peroxidation inhibition assay	52-52
2.6. Antibacterial activity of the synthetic compounds using well diffusion method	52-53
2.6.1. Preparation of synthetic compounds for microbiological assay	52-52
2.6.2. Test Organisms	53-53
2.6.3. Preparation of media	53-53
2.6.4. Preparation of culture media and inoculation method	53-53
2.6.5. Agar well diffusion method	53-54
2.7. Molecular modeling analysis	54-54
2.7.1. Swiss target prediction	54-54
2.7.2. Molecular Docking	54-54
References	55-56
CHAPTER-III: DNA BINDING, AMELIORATION OF OXIDATIVE STRESS AND MOLECULAR DOCKING STUDY OF Zn(II) METAL COMPLEX OF A NEW SCHIFF BASE LIGAND	57-81
3.1. Introduction	57-58
3.2. Experimental Section	58-58
3.2.1. Synthesis of Schiff Base Ligand	58-58
3.2.2. Synthesis of Metal Complex	58-58

3.3. Results and Discussion	59-77
3.3.1. Characterization of the ligand and its Zn(II) complex	59-64
3.3.1.1. Molar Conductance	59-59
3.3.1.2. Infrared Spectra	60-61
3.3.1.3. NMR Spectra	61-63
3.3.1.4. Electronic Spectra	63-64
3.3.2. DNA binding study	64-69
3.3.2.1. Absorption study	64-65
3.3.2.2. Ethidium Bromide (EB) competitive study with fluorescence emission spectroscopy	65-66
3.3.2.3. Thermal denaturation study	66-67
3.3.2.4. Viscosity measurement	67-68
3.3.2.5. DNA cleavage study	68-70
3.3.3. Molecular modeling analysis	70-72
3.3.3.1. Swiss target prediction	70-70
3.3.3.2. Molecular Docking	70-72
3.3.4. In vitro antioxidant activity	72-78
3.4. Conclusions	78-78
References	79-82

CHAPTER-IV: DNA INTERACTION AND MOLECULAR DOCKING STUDY OF A NOVEL SCHIFF BASE Co(II) COMPLEX	83-102
4.1. Introduction	83-84
4.2. Experimental Section	84-90
4.2.1. Synthesis of Schiff Base Ligand	84-84
4.2.2. Synthesis of Metal Complex	84-84
4.3. Results and Discussion	85-92
4.3.1. Characterization of the ligand and its Co(II) complex	85-90

4.3.1.1. Molar Conductance	85-85
4.3.1.2. Electronic Spectra and magnetic moment measurement	85-86
4.3.1.3. Infrared Spectra	86-87
4.3.1.4. NMR Spectra	87-88
4.3.1.5. Thermogravimetric analysis	88-89
4.3.1.6. Powdered XRD spectra	89-89
4.3.1.7. Stability constant and stoichiometry of complex	90-90
4.3.2. DNA interaction studies	90-94
4.3.2.1. Electronic absorption titration	90-91
4.3.2.2. Ethidium Bromide (EB) competitive study with fluorescence emission spectroscopy	92-92
4.3.2.3. DNA melting study	93-93
4.3.2.4. Viscosity measurement	93-94
4.3.3. Molecular Docking study	94-96
4.3.4. Antibacterial activity	96-97
4.3.5. Conclusion	97-98
References	99-102

CHAPTER-V: SYNTHESIS, CHARACTERIZATION, ANTIOXIDANT AND DNA CLEAVAGE STUDY OF NOVEL COPPER (II) COMPLEX **103-114**

5.1. Introduction	103-103
5.2. Experimental Section	104-104
5.2.1. Synthesis of [Diaquo {bis (<i>p</i> -hydroxybenzoato- κ^1O^1)} (1-methylimidazole- κ^1N^1)} copper (II)]	104-104

5.3. Results and Discussion	104-111
5.3.1. Characterization of the synthesized compound	104-108
5.3.1.1. X-ray crystallographic Studies	104-106
5.3.1.2. FTIR Spectroscopic study	107-107
5.3.1.3. Magnetic moment and EPR analysis	107-108
5.3.2. Molecular Docking Analysis	108-108
5.3.3. DNA cleavage study	109-109
5.3.4. <i>In vitro</i> antioxidant activity	110-111
5.4. Conclusion	111-111
References	112-114

CHAPTER-VI : IONIC LIQUID TAGGED AZO-AZOMETHINE BASED Zn(II) COMPLEX: SYNTHESIS, CHARACTERIZATION, BIOLOGICAL ACTIVITY 115-130

6.1. Introduction	115-116
6.2. Experimental Section	116-118
6.2.1. Synthesis of Azo derivative of Salicylaldehyde	116-116
6.2.2. Synthesis of amino functionalized ionic liquid	117-117
6.2.3. Synthesis of ionic liquid tagged azo-azomethine ligand	119-119
6.2.1.4. Synthesis of Zn(II) metal complex	120-120
6.3. Results and discussion	121-127
6.3.1. Characterization of the ligand and its Zn(II) complex	121-123
6.3.1.1. IR spectral studies	121-122
6.3.1.2. ¹ H NMR spectral studies	123-123
6.3.1.3. Electronic absorption spectra	124-124
6.3.2. DNA binding study	124-126
6.3.2.1. Electronic absorption titration	124-125
6.3.2.2. Fluorescence emission spectroscopy	125-126
6.3.3. Molecular docking study	127-127
6.3.4. Conclusion	128-128
References	129-130

Concluding remarks	131-132
<hr/>	
APPENDIX	133-134
BIBLIOGRAPHY	135-150
INDEX	151-152
