

# TABLE OF THE CONTENTS

<b>Topic</b>	<b>Page No.</b>
ABSTRACT.....	i
PREFACE.....	iv
Acknowledgement .....	v
TABLE OF THE CONTENTS.....	vi
LIST OF TABLES.....	xi
LIST OF FIGURES .....	xiv
LIST OF APPENDICES.....	xix
<b>Chapter I: General Introductoin.....</b>	<b>1-16</b>
Introduction.....	1
1.1. Schiff bases .....	1
1.2. Structure and physicochemical properties of Schiff base .....	2
1.3. Application of Schiff base and their coordination compounds.....	4
1.4. Scope and objectives of the present study .....	9
References.....	11-16
<b>Chapter II: Synthesis and Structural Characterization of a Linkage Isomer to a Mononuclear Nickel(II) Complex: Experimental and Computational Depiction of Phosphoestase Efficiency .....</b>	<b>17-41</b>
2.1. Introduction.....	17
2.2. Experimental section.....	18
2.2.1. Preparation of the complex .....	18
2.2.1.1. Chemicals, solvents and starting materials.....	18
2.2.1.2. General procedure for the synthesis of Ni(II) compound 1.....	18
2.2.2. Physical measurements .....	18
2.2.3. X-ray diffraction study.....	19
2.2.4. Hirshfeld surface analysis of 1.....	19
2.2.5. Phosphatase activity by the nickel(II) complex 1 .....	19
2.2.6. Computational methodology.....	20
2.3. Results and discussion .....	20
2.3.1. Synthesis and formulation of 1 .....	20

2.3.2. Infrared spectral analysis of 1 .....	21
2.3.3. Electronic spectral analysis of 1 .....	22
2.3.4. X-ray crystallographic analysis of 1 .....	22
2.3.5. Hirshfeld surface analysis of 1.....	26
2.3.6. Theoretical calculations of 1 .....	28
2.3.7. Spectrophotometric investigation of phosphatase activity .....	30
2.3.8. Mechanistic pathway .....	34
2.4. Conclusion .....	37
References.....	38-41
<b>Chapter III: Head-to-Tail Interlocking Aromatic Rings of a Hydrazine Functionalized Schiff Base for the development of Nano-aggregates with blue emission: Structural and Spectroscopic Characteristics .....</b>	<b>42-70</b>
3.1. Introduction.....	42
3.2. Experimental.....	43
3.2.1. Preparation of the complex .....	43
3.2.1.1 Chemicals, solvents and starting materials.....	43
3.2.1.2. General procedure for the synthesis of Schiff base .....	44
3.2.2. Physical measurements .....	44
3.2.3. Crystal structure determination, refinement and Hirshfeld surface analysis .....	44
3.2.4. Preparation and characterisation of the molecular aggregate .....	45
3.3. Results and discussion .....	45
3.3.1. Synthesis and formulation of L <sup>2</sup> .....	45
3.3.2. Infrared spectral analysis of L <sup>2</sup> .....	45
3.3.3. Electronic spectral analysis.....	46
3.3.4. Fluorescence spectral analysis of L <sup>2</sup> and the aggregate of L <sup>2</sup> .....	47
3.3.5. NMR spectral analysis of L <sup>2</sup> .....	48
3.3.6. MALDI TOF Mass spectral analysis of L <sup>2</sup> .....	50
3.3.7. Microscopic analysis of the aggregate of L <sup>2</sup> .....	50
3.3.8. Spectroscopic studies on the L <sup>2</sup> aggregate .....	52
3.3.9. X-ray crystallographic analysis and self-assembly.....	54
3.3.10. Hirshfeld surface and energy framework analysis of L <sup>2</sup> .....	58
3.3.11. Structural perspectives and underlying mechanism for AIE property of the L <sup>2</sup> . 61	
3.4. Conclusions.....	66
References.....	67-70

<b>Chapter IV: Copper(II) Complexes with a Benzimidazole Functionalized Schiff base: Synthesis, Crystal Structures, and Role of Ancillary ions in Phenoxazinone Synthase Activity</b> .....	71-104
4.1. Introduction.....	71
4.2. Experimental Section.....	72
4.2.1. Preparation of the complex .....	72
4.2.1.1. Materials and Methods .....	72
4.2.1.2. Synthesis of the ligand L <sup>3</sup> , copper complexes 2 and 3 .....	73
4.2.2. Physical measurements .....	73
4.2.3. X-ray structural studies and refinement.....	74
4.2.4. Hirshfeld surface analysis of the complexes 2 and 3.....	74
4.2.5. Catalytic oxidation studies of 2-aminophenol .....	74
4.2.6. Detection of hydrogen peroxide in the course of catalysis.....	75
4.2.7. Electrochemical analysis of L <sup>3</sup> , 2 and 3.....	75
4.3. Results and discussion .....	75
4.3.1. Synthesis and formulation of the ligand L <sup>3</sup> , complex 2 and 3 .....	75
4.3.2. Infrared spectral analysis of L <sup>3</sup> , 2 and 3 .....	76
4.3.3. Electronic spectral analysis of L <sup>3</sup> , 2 and 3.....	77
4.3.4. NMR spectral analysis of L <sup>3</sup> .....	79
4.3.5. Description of crystal structures of 2 and 3 .....	81
4.3.6. Hirshfeld surface analysis of 2 and 3.....	84
4.3.7. Catalytic oxidation studies of 2-aminophenol and mechanistic inferences.....	89
4.4. Conclusions.....	99
References.....	101-104
<b>Chapter V: Schiff Base Triggering Synthesis of Copper(II) Complex and its Catalytic Fate towards Mimics of Phenoxazinone Synthase Activity</b> .....	105-137
5.1. Introduction.....	105
5.2. Experimental Section.....	106
5.2.1. Preparation of the complex .....	106
5.2.1.1. Materials and Methods .....	106
5.2.1.2. Synthesis of the Schiff base L <sup>4</sup> and copper complex 4 .....	106
5.2.2. Physical measurements .....	107
5.2.3. Crystal structure determination and refinement.....	108
5.2.4. Hirshfeld surface analysis of complex 4.....	108

5.2.5. Phenoxazinone synthase activity of complex 4 .....	108
5.2.6. Detection of presence of hydrogen peroxide in the catalytic oxidation of 2-aminophenol.....	109
5.2.7. Electro-chemical analysis .....	110
5.2.8. Computational details .....	110
5.3. Results and discussion .....	110
5.3.1. Synthesis and formulation of the Schiff base L <sup>4</sup> and complex 4 .....	110
5.3.2. Infrared spectral analysis of L <sup>4</sup> and complex 4.....	111
5.3.3. Electronic spectral analysis of L <sup>4</sup> and complex 4 .....	112
5.3.4. Fluorescence property of L <sup>4</sup> and complex 4 .....	113
5.3.5. Molar conductance measurement .....	114
5.3.6. NMR spectral analysis of L <sup>4</sup> .....	114
5.3.7. ESI-MS spectra analysis.....	115
5.3.8. Theoretical calculation of complex 4.....	116
5.3.9. Description of crystal structure of complex 4.....	117
5.3.10. Hirshfeld analysis of complex 4 .....	121
5.3.11. Phenoxazinone synthase mimicking activity of the complex 4.....	123
5.4. Conclusions.....	131
References.....	132-137
<b>Chapter VI: Schiff Base Driven Denticity-Fluctuated Structural Assortment of Zinc-pseudohalide Complexes: Synthesis, Structures and Electrical Transport Properties</b> .....	138-169
6.1. Introduction.....	138
6.2. Experimental Section.....	139
6.2.1. Preparation of the complex .....	139
6.2.1.1. Materials and Methods .....	139
6.2.1.2. Synthesis of the Schiff base L <sup>4</sup> , zinc complexes 5 and 6 .....	140
6.2.2. Physical measurements .....	140
6.2.3. X-ray structural studies and refinement.....	141
6.2.4. Hirshfeld surface and energy framework analysis of the zinc complexes.....	141
6.2.5. Device construction and electrical conductivity under the photo- and dark conditions.....	142
6.2.6. Powder X-ray diffraction (PXRD) analysis.....	142
6.3. Results and discussion .....	142

6.3.1. Synthesis and formulation of L <sup>4</sup> and zinc complexes.....	142
6.3.2. Infrared spectral analysis of L <sup>4</sup> and complexes 5, 6 .....	143
6.3.3. Electronic spectral analysis of complexes 5 and 6 .....	144
6.3.4. <sup>1</sup> H NMR spectral analysis of zinc complexes.....	145
6.3.5. Description of crystal structure and supramolecular interactions.....	147
6.3.6. Hirshfeld surface and energy framework analysis of complexes 5 and 6 .....	151
6.3.7. Dark- and photo-electrical conductivities studies.....	156
6.3.8. PXRD analysis of zinc complexes.....	163
6.4. Conclusion .....	164
References.....	166-169
<b>Chapter VII: Summary and future scope.....</b>	<b>170-171</b>
<b>APPENDIX.....</b>	<b>172-174</b>
<b>BIBLIOGRAPHY.....</b>	<b>175-193</b>
<b>INDEX.....</b>	<b>194-196</b>
