		Page No.
Abstract	(3 pages)	i
Preface	(1 page)	v
List of Tables	(1 page)	xiii
List of Schemes	(6 pages)	xv
List of Figures	(2 page)	xxi
List of Appendices	(1 page)	xxiii
Appendix A: List of Research Publications	(1 page)	xxv
Appendix B: Poster Presentations	(1 page)	xxvii
Abbreviation		xxix

# CHAPTER I

## Carbon hetero bond formation reactions and a brief overview

I.A. Introduction to carbon-hetero bond	03
I.A.1. C-N bond formation reaction	03
I.A.2. C-O bond formation reaction	05
I.A.3. C-S bond formation reaction	06
I.A.4. C-P bond formation reaction	08
I.A.5. Synthesis of pyrazolines	09
I.A.6. Synthesis of pyrroles	09
I.A.7. Synthesis of imidazoles	10
I.A.8. Synthesis of 2,3-dihydroquinazolin-4(1 <i>H</i> )-ones	10
I.A.9. Synthesis of 2-aminobenzoxazoles	10
I.B. Conclusion	11
I.C. References	11

## CHAPTER II

### Room temperature direct reductive amination of carbonyl compounds by L-ascorbic acid–NaBH<sub>4</sub> in water

II.A. Introduction	15
II.B. Background and objectives	16
II.B.1. Specialized methods for synthesis of substituted amines	17
II.B.2. Modern approach towards reductive amination	18
II.B.3. Background of L-ascorbic acid in organic synthesis	23
II.C. Present Work	24
II.C.1. Result and discussion	25
II.D. Conclusion	30
II.E. Experimental	30
II.E.1. General Information	30
II.E.2. General procedure for the Direct reductive amination	30
II.E.3. Spectroscopy data	30
II.E.4. Scanned copies of <sup>1</sup> H and <sup>13</sup> C NMR of the derivatives	34
II.F. Reference	37

## CHAPTER III

### Humic acid catalyzed solvent-free green protocol for synthesis of thioamide

III.A. Introduction	41
III.B. Background and Objectives	41
III.B.1. Specialized methods for synthesis of thioamides	42
III.B.2. Modern approach towards thioamide synthesis	43
III.B.3. Background of Humic acid in organic synthesis	45
III.C. Present work	47
III.C.1. Result and discussion	47
III.C.2. Catalyst recovery	51
III.D. Conclusion	51
III.E. Experimental	51
III.E.1. General Information	51
III.E.2. General procedure	51
III.E.3. Spectroscopy data	52
III.E.4. Scanned copies of $^1\text{H}$ and $^{13}\text{C}$ NMR of the derivatives	54
III.F. Reference	57

## CHAPTER IV

### **Greener one-pot synthesis of 3-substituted indoles using L-ascorbic acid in water as green eco-friendly catalyst and alternatively using PEG-300 in catalyst-free condition**

IV.A. Introduction	61
IV.B. Background and objectives	61
IV.B.1. Specialized methods for synthesis of 3-substituted amino indoles	62
IV.B.2. Modern approach towards 3-substituted amino indoles	63
IV.B.3. Background of PEG 300 in organic synthesis	68
IV.C. Present Work	69
IV.C.1. Result and discussion	70
IV.D. Conclusion	75
IV.E. Experimental	76
IV.E.1. General Information	76
IV.E.2. General Procedure	76
IV.E.3. Spectroscopy data	76
IV.E.4. Scanned copies of $^1\text{H}$ and $^{13}\text{C}$ NMR	78
IV.F. References	80

## CHAPTER V

### Ethyl lactate mediated transition metal-free efficient synthesis of azobenzenes

V.A. Introduction	83
V.B. Background and objectives	84
V.B.1. Classical method for Synthesis of azobenzenes	84
V.B.2. Modern approaches for synthesis of azo compounds	85
V.B.3. Background of Ethyl lactate in organic synthesis	88
V.C. Present Work	89
V.C.1. Result and discussion	90
V.D. Conclusion	93
V.E. Experimental	93
V.E.1. General Information	93
V.E.2. General procedure for the synthesis of symmetric azobenzenes from amines	93
V.E.3. Spectroscopy data	93
V.E.4. Scanned copies of $^1\text{H}$ and $^{13}\text{C}$ NMR of the derivatives	95
V.F. Reference	97
