List of Figures	1
List of Tables.....	5

CHAPTER 1: INTRODUCTION, REVIEW OF LITERATURE, OBJECTIVES, MATERIALS AND METHODS.....7

Section 1.1: Introduction	9
1.1.1 Tea cultivation in India	9
1.1.2 Looper pests in the Tea plantations of the Terai-Dooars region of India.....	11
1.1.3 Management of Tea pest population.....	12
1.1.4 Baculovirus as bioinsecticide	13
1.1.5 Genome structure of the family Baculoviridae.....	14
1.1.6 Classification of Baculoviridae.....	15
1.1.7 Nucleopolyhedroviruses in IPM	15
1.1.8 Morphological structure of NPV	16
1.1.9 The infection cycle of NPV	17
1.1.10 Signs and symptoms	18
1.1.11 NPV as bioinsecticides	19
1.1.11.1 Disadvantages of the use of Natural NPVs as insecticides	20
1.1.12 Genetically modified NPVs as Bioinsecticides	20
1.1.12.1 Advantages of genetically modified NPVs as bioinsecticides.....	21
1.1.13 <i>Hyposidra talaca</i> nucleopolyhedrovirus (HytaNPV)	21
Section 1.2: Review of literature	23
1.2.1 Molecular characterization of Baculovirus genome by Restriction endonuclease (REN) fragment analyses.....	23
1.2.2 Molecular characterization of Baculovirus genome by sequencing	24
1.2.3 Phylogenetic analyses of baculoviruses.....	26
1.2.4 Baculovirus core genes	28
1.2.5 Baculovirus Core Proteins	29
1.2.5.1 Matrix Protein	30
1.2.5.2 Envelope proteins of budded virions.....	30
1.2.5.3 Oral infectivity factors/ <i>per os</i> infectivity factors (<i>pif</i>) (additional envelope proteins of ODVs)	30
1.2.5.4 Proteins involved in packaging, assembly, and release	31

1.2.5.5 Proteins involved in replication	33
1.2.5.6 Proteins involved in Transcription.....	33
1.2.5.7 Proteins involved in cell cycle arrest and/or interaction with host proteins	34
1.2.6 Application of NPVs as bioinsecticides	34
1.2.7 Molecular Characterization of <i>Hyposidra talaca</i> NPV genome	36
Section 1.3: Objectives	39
Section 1.4: Materials and Methods	41
1.4.1 Survey.....	41
1.4.2 Sample collection	41
1.4.2.1 Collection time.....	41
1.4.2.2 Sampling sites	42
1.4.3 Rearing and culture of <i>Hyposidra talaca</i>	42
1.4.4 Isolation and purification of OBs (virus particles) from NPV-infected cadavers	43
1.4.5 Recognition of virus by Phase contrast microscopy.....	44
1.4.6 Counting Polyhedra Occlusion Bodies (OBs).....	44
1.4.7 Maintenance and Mass production of HytaNPV OBs under laboratory conditions ...	44
1.4.8 Extraction and Purification of DNA from Polyhedra Occlusion Bodies of <i>H. talaca</i> NPV	45
1.4.9 <i>In vivo</i> Restriction Endonuclease Digestion.....	45
1.4.9.1 Electrophoresis of digested samples	46
1.4.10 Construction of <i>in silico</i> Restriction map.....	46
1.4.11 Designing of Primers.....	46
1.4.12 Polymerase Chain Reaction (PCR)	47
1.4.13 Detection and purification of PCR amplified product for sequencing.....	48
1.4.14 Sequencing of the amplified products	48
1.4.15 Sequence alignment and BLAST search	48
1.4.16 Sequence representations	49
1.4.17 Sequence comparison	49
1.4.18 Sequence Divergence	49
1.4.19 Phylogenetic analysis	49
CHAPTER 2: RESULTS	53
Section 2.1: The HytaNPV isolates in the present study.....	55

Section 2.2: Survey, sampling, preparation and maintenance of virus culture.....	57
2.2.1 Survey and sampling of <i>Hyposidra talaca</i> larvae (looper).....	57
2.2.2 Isolation and purification of Occlusion bodies (virus particles) and maintenance of virus stock.....	60
2.2.3 Isolation of DNA from OBs	60
Section 2.3: Restriction Endonuclease Fragment analysis	65
2.3.1 <i>In vitro</i> analysis of restriction fragment profile analysis of the HytaNPV genome from Terai and the Dooars region of West Bengal, India	65
2.3.2 Comparative analyses of <i>in vitro</i> restriction endonuclease fragment profiles of HytaNPVs of the present study with <i>in silico</i> digestion profile of HytaNPV-R (Nguyen et al, 2018)	72
2.3.2.1 <i>In silico</i> restriction map of HytaNPV-R (MH261376.1; Nguyen et al, 2018).....	72
2.3.2.2 Comparison of <i>in vitro</i> and <i>in silico</i> restriction endonuclease fragment profiles of HytaNPV isolates	78
Section 2.4: Sequencing and characterization of HytaNPV genes.....	83
2.4.1 PCR amplification of selected genes	83
2.4.2 Sequencing of the <i>polyhedrin</i> gene.....	90
2.4.2.1 Blast analysis.....	90
2.4.2.2 Alignment.....	90
2.4.2.3 Restriction sites on <i>polyhedrin</i> sequence	93
2.4.3 Sequencing of <i>lef-8</i> gene	94
2.4.3.1 Blast analysis.....	94
2.4.3.2 Alignments	94
2.4.3.3 Restriction sites on <i>lef-8</i> sequence	99
2.4.4 Sequencing of <i>lef-9</i> gene	100
2.4.4.1 Blast analysis.....	100
2.4.4.2 Alignments	100
2.4.4.3 Restriction sites on <i>lef-9</i> sequence	104
2.4.5 Sequencing of <i>pif-1</i> gene	105
2.4.5.1 Blast analysis.....	105
2.4.5.2 Alignments	105
2.4.5.3 Restriction sites on <i>pif-1</i> sequence	109
2.4.6 Sequencing of <i>pif-2</i> gene	110
2.4.6.1 Blast analysis.....	110
2.4.6.2 Alignments	110
2.4.6.3 Restriction sites on <i>pif-2</i> sequence	113

2.4.7 Sequencing of <i>pif-3</i> gene	114
2.4.7.1 Blast analysis	114
2.4.7.2 Alignments.....	114
2.4.7.3 Restriction sites on <i>pif-3</i> sequence.....	117
2.4.8 Sequence alignment analysis	118
2.4.9 Partial restriction maps of HytaNPV isolates.....	121
Section 2.5: Phylogenetic Analysis.....	125
2.5.1 Phylogenetic analyses with 77 baculoviruses	125
2.5.2 Comprehensive phylogenetic analyses with 19 baculoviruses representing each group	131
CHAPTER 3: DISCUSSION, CONCLUSION, & SUMMARY	137
Section 3.1: Discussion.....	139
3.1.1 Restriction endonuclease (REN) fragment analysis	140
3.1.2 Analyses of gene sequences	145
3.1.3 Phylogenetic analysis	148
Section 3.2: Conclusion.....	151
Section 3.3: Summary	153
CHAPTER 4: APPENDIX, BIBLIOGRAPHY, INDEX	157
Section 4.1: Appendix	159
4.1.1 Publications	159
4.1.2 Papers presented at conferences	159
Section 4.2: Bibliography	161
Section 4.3: Index	183
