1	Introduction	4
1.1	The equation of radiative transfer	4
1.1.1	Equation of transfer in different media and geometries:	4
1.2	The double interval spherical harmonic method:	9
1.2.1	Application of SHM in solving Radiative transfer problem	17
1.3	The interlocking problem:	27
1.3.1	Formation of absorption lines : Coherent Scattering	27
1.3.2	Formation of absorption lines:Interlocking without redistribution	28
1.3.3	Works on Interlocking problem	31
2	Solution of the equation of radiative transfer for inter- locked doublets by double interval spherical harmonic method	39
2.1	Equation of Transfer	39
2.2	Solution	43
2.3	First approximation	46
2.3.1	First approximation when $r = 1$	46
2.3.2	First approximation when $r = 2$	48

2.3.3	Determination of a/A	51
2.4	Second approximation	53
3	Solution of the equation of radiative transfer for inter- locked triplets by double interval spherical harmonic method	62
3.1	Equation of Transfer	62
3.2	Solution	67
3.3	First approximation	71
3.3.1	First approximation when $r = 1$	71
3.3.2	First approximation when $r = 2$	72
3.3.3	First approximation when $r = 3$	73
3.3.4	Determination of a/A	79
3.4	Second approximation	80
4	Solution of radiative transfer problem in thin atmosphere with double interval spherical harmonic method	91
4.1	The Equation and the Boundary Conditions	91
4.2	Method of Solution	92
4.3	First approximate solution for scattering with Rayleigh phase function	95
4.4	Second approximate solution for scattering with Rayleigh phase function	95
4.5	First approximate solution in the case of scattering with the phase function $p(\mu, \mu') = 1 + w_1 p_1(\mu) p_1(\mu') + w_2 p_2(\mu) p_2(\mu')$	99

4.6	Second approximate solution in the case of scattering with the phase function	
	$p(\mu, \mu') = 1 + w_1 p_1(\mu) p_1(\mu') + w_2 p_2(\mu) p_2(\mu')$	103
4.7	First approximate solution for scattering with Pomraning phase function	104
4.8	Second approximate solution for scattering with Pomraning phase function	107
5	Solution of the equation of transfer with Carlstedt and Mullikin's phase function	113
5.1	The equations and boundary conditions :	113
5.2	First approximate solution in case of scattering with Carlstedt and Mullikin's phase function	116
5.3	Second approximation	120
6	Approximate H-function for anisotropic scattering : Carlstedt and Mullikin's phase function	125
6.1	Formation of the problem	125
6.1.1	Case I	127
6.1.2	Case II	128
6.1.3	Case III	129
6.1.4	Case IV	131
6.1.5	Case V	133
6.1.6	Case VI	135
	Bibliography
