Preface	vii
Notations and Abbreviations	xvi
1 Introduction	1
1.1 Scope and Motivation	2
1.2 The CS Thesis: A Brief Introduction	7
1.3 General Transformation for SR	9
1.4 Topic-wise Summary	11
1.4.1 Relativistic Sagnac Effect and Ehrenfest Paradox	11
1.4.2 Conventionality of Simultaneity and Tippe Top Paradox	11
1.4.3 On the Anisotropy of the Speed of Light on a Rotating Platform and Selleri Paradox	13
1.4.4 Sagnac Formula from the Perspective of Rotating Platform and Absolute Synchrony	14
1.4.5 Sagnac effect in Curved Spacetime	15
Reference	15
1.5 List of Publications	18
2 Sagnac Effect	20

2.1	Introduction	21
2.2	Sagnac Effect	21
2.3	Historical Perspective	23
2.4	Sagnac's Experiment	25
2.5	Formal Derivations of Sagnac Formula	30
2.5.1	Classical Derivation of Sagnac Effect	30
2.5.2	Relativistic Sagnac effect	33
2.5.3	Metrical Treatment of Sagnac Effect	35
2.6	Sagnac Effect in Curved Spacetime : Formal Approach	37
2.7	GPS and Sagnac Effect	42
2.8	The Area factor: the LSE and the FOC Experiments	44
2.8.1	Linear Sagnac Effect (LSE)	44
2.8.2	FOC Experiment	45
	References	47
3	Relativistic Sagnac effect and Ehrenfest Paradox	52
3.1	Introduction	53
3.2	Ehrenfest Paradox	53
3.3	Sagnac effect and Ehrenfest Paradox	55
3.4	Sagnac effect in a Linear Platform	57
3.5	Linear Sagnac Effect – I	58
3.6	Linear Sagnac Effect – II	64
3.7	Coordinate System of the Unbonded Frame	67
3.8	Discussion	70
3.9	Summary	75
	References	77

4	Conventionality of Simultaneity and Tippe Top Paradox	80
4.1	Introduction	81
4.2	Equation of Motion and Coordinate System	84
4.3	Conventionality of Simultaneity and Transformation Equations . .	87
4.3.1	Relativistic World	87
4.3.2	Galilean World	90
4.4	Tippe top Paradox in the Galilean World	92
4.5	Lack of Synchronization – Is It Crucial?	95
4.6	Rigidity and Transcendental Equation	96
4.7	Summary	97
	References	100
5	On the Anisotropy of the Speed of Light on a Rotating Platform	102
5.1	Introduction	103
5.2	The Paradox	107
5.3	CS Thesis and Absolute Synchrony	112
5.4	Selleri Paradox in the Galilean World	115
5.5	Desynchronization	124
5.6	Synchrony – A Value Judgement	127
5.7	Conclusion	129
	References	130
6	Sagnac Formula from the Rotating Frame Perspective and the Absolute Synchrony	135
6.1	Introduction	136
6.2	Post's Calculation	138
6.3	Derivation of TT from Post's Transformation	140

6.4	Derivation of TE (Appendix of Post's Paper)?	142
	References	144
7	Sagnac Effect in Curved Spacetime	146
7.1	Introduction	147
7.2	Sagnac effect in a Schwarzschild field	149
7.3	Sagnac Effect in an Equatorial Orbit	152
7.3.1	Experiment with Rockets	152
7.3.2	Natural Orbit, the "Free Falling Observer"	153
7.4	Sagnac Effect in Kerr-Newman Field	156
7.5	Experiments with Rockets and Sattelites in Kerr-Newman Field . .	160
7.6	Arbitrarily Large Sagnac Phase-shift	162
	References	165
A	Conventionality of Simultaneity: A Review	167
A.1	Light speed and Synchronization	168
A.2	Reichenbach Formulation	170
A.3	Einstein Synchrony and Relativity of Simultaneity	172
A.4	Absolute synchrony	173
A.5	Synchronization in Rotating Ring	174
A.6	Criticism of the CS Thesis: Arguments and Counter Arguments .	176
A.7	Slow Clock Transport	179
A.8	SCT And The CS Thesis	181
A.9	Discussions	182
	Reference	184
B	CS Thesis and General Transformation Equations	189
B.1	Introduction	190

B.2	The Transformation Matrix	193
B.3	Determination of a	197
B.4	Transformation in Different Worlds	200
B.4.1	Classical World	200
B.4.2	Relativistic World	201
B.4.3	Discussion on TT	204
B.4.4	OWS of light in Relativistic world	208
B.5	The Reichenbach Parameter ϵ	208
B.6	Composite Transformation Matrix	209
B.7	Synchronization with Non-luminal Signal	210
B.7.1	The Derivation of Transformation Equation	211
B.8	Epilogue	219
	References	221
	Bibliography	223
	Index	236
