Preface ...	iii
<u>CHAPTER - I</u> <u>INTRODUCTION</u>	
1.1 Cosmic rays at ground level : single particles	1
1.1.1 High energy muon interaction process ...	2
1.1.2 Inter-relation between atmospheric cosmic rays and the primary nuclei (The galactic cosmic rays)	3
1.2 Extensive air showers	3
1.2.1 The soft component	5
1.2.2 The muon component	6
1.3 Present work	6
References	8
<u>CHAPTER - II</u> <u>DIRECT ELECTRON-PAIR PRODUCTION BY MUONS</u>	
2.1 Introduction	11
2.2 Theory of DPP process	12
2.2.1 The calculation of Shabha	13
2.2.2 The treatment of Murota, Jeda and Tanaka (MUT)	20
2.2.3 Treatments of Kel'ner, Kel'ner-Kotov ...	22
2.2.4 Treatment of Kokoulin and Petrukhin (KP) ...	29
2.3 Consideration of some other effects	30

	Page	
2.4	Sea-level measurements	32
2.4.1	Experimental set-up	32
2.4.2	Method of triggering and other operational details ...	33
2.4.3	Underground measurements	35
2.4.4	Selection and analysis of events	36
2.5	Estimation of energy transfer	36
2.6	Theoretical interaction cross sections ...	40
2.7	Errors and corrections	40
2.8	Experimental results	44
2.9	Discussion	48
	References	51

CHAPTER - III ANALYSIS OF ATMOSPHERIC
GAMMA-RAY AND MUON DATA

3.1	Introduction	53
3.2	Method of calculation	54
3.2.1	Calculation of production spectra of cosmic-ray mesons	56
3.3	Derivation of the primary nucleon spectrum	53
3.3.1	Inter-relation between primary spectrum and gamma-ray spectrum at the top of the atmosphere	59
3.3.2	Inter-relation between primary spectrum and sea level muon spectrum	60
3.4	Improved calculation of sea-level muon spectra ...	64

3.5	Calculation of primary spectrum from observed gamma-ray spectra and muon spectra ...	65
3.5.1	Final estimation of primary spectrum ...	67
3.6	Comparison ...	63
3.7	Discussion ...	69
	References	70

CHAPTER - IVA NEW AIR SHOWER DETECTION
SYSTEM WITH MAGNETIC
SPECTROGRAPH

4.1	Introduction	73
4.2	Experimental arrangement	73
4.2.1	The air shower array	73
4.2.2	Magnetic spectrograph units	74
4.2.3	Electron density detectors	76
4.2.4	Flash tube chamber : Muon detector ...	77
4.3	Data acquisition, storage and transfer ...	73
4.4	Operation and response of the array system ...	80
	References	83

CHAPTER - VELECTRONICS OF THE RECORDING
SYSTEM AND RESPONSE-CALIBRATION

5.1	Introduction	34
5.2	Description of the electronic circuit and its operation	85
5.3	Selection system and coincidence unit ...	86

	Page	
5.4	Control unit and High voltage unit of flash-tube chamber and magnetic spectrograph	88
5.5	Master control unit	88
5.6	'Sample-Hold' and Analogue multiplexer for multidetector system ...	90
5.6.1	Principle of operation	90
5.6.2	Description of the circuit	91
5.6.3	Operation of the circuit	92
5.7	Monitor unit	95
5.8	Analogue to digital converter ...	96
5.8.1	Principle of operation	96
5.8.2	Description of the converter circuit ...	97
5.8.3	Operation of the circuit	99
5.9	Random access memory with programmer for data acquisition and printing in a multidetector system	102
5.9.1	Description of the circuit	102
5.9.2	Operation of the circuit	103
5.10	Memory unit of magnetic spectrograph ...	106
5.11	Measurement of single particle pulse height and efficiency of the plastic scintillators	109
5.12	Cross calibration of the channel	111
5.13	Response of the flash tube chamber ...	111

5.14	Day-to-day maintenance of the circuit ...	111
	References	113

CHAPTER - VI PROCEDURE OF ANALYSIS

6.1	Handling of data	114
6.2	Evaluation of shower parameters ...	114
6.2.1	Age as a constant parameter	115
6.2.2	χ^2 - minimisation	115
6.3	Estimation of error in the method of analysis	119
6.3.1	Artificial shower test	119
6.3.2	Error due to the size of the detector ...	120
6.4	Analysis of the flash-tube chamber data ...	122
	References	124

CHAPTER - VII LATERAL DISTRIBUTION OF
ELECTRONS AND MUONS

7.1	Introduction	125
7.2	Experimental arrangement	126
7.3	Shower selection procedure	126
7.4	Experimental data analysis	127
7.5	Experimental results	128
7.5.1	Lateral distribution of electrons ...	129
7.5.2	Lateral distribution of muons ...	129

	Page
7.5.3 Local age parameter	134
7.5.3.1 Variation of local age parameter with core distance ...	135
7.5.3.2 Variation of local age parameter with shower size ...	135
7.6 Comparison and discussion	136
References	138
