

A C K N O W L E D G E M E N T

The work described in the thesis was carried out under the supervision of Professor N. Chaudhuri and in collaboration with Dr. G. C. Goswami, Mr. M. R. Ghoshdastidar, Dr. N. L. Karmakar, Dr. A. Paul, Dr. D. K. Basak and Dr. S. K. Sengupta.

The loan of equipment from the Department of Atomic Energy, Government of India and gift of neon flash tubes from the University of Durham under the advice of Professor A. W. Wolfendale is gratefully acknowledged.

The financial assistance in the form of a UGC research fellowship during the period 1977-1980 and the grant of Sr. Research Assistantship by the University of North Bengal for the subsequent period is thankfully acknowledged.

The advice of Professor M. S. Saha as a UGC visiting professor to NBU in building up of two magnetic spectrograph units is gratefully remembered. The suggestions of Professor O. C. Allkofer and Professor M. Samorski of the University of Kiel and of Professor G. Tanahashi of the Institute for Cosmic Ray Research, University of Tokyo in connection with the problem of noise from high voltage flash tube units is gratefully acknowledged.

Thanks are due to the co-workers, Mr. S. Sarkar, Mr. M. Roy, Dr. S. C. Das and Dr. S. K. Sengupta, for their cooperation at all stages of the work.

The whole-hearted efforts of Mr.P.Tamang, electronic technician, Department of Physics towards the installation of the magnetic spectrographs in 1979-80, are recorded with thanks. The technical staff comprising of Mr.K.L.Das, Mr.K.Chhetri, Mr.R.Dasgupta and Mr.A.Chhetri are thanked for their assistance at all stages of the work.

The author bears deep sentiments for the continued inspiration of his father and others of his family during the long period of work at North Bengal University and remembers the affection and inspiration from his mother who passed away while this work was being carried out. This thesis is dedicated to her memory.
