

ACKNOWLEDGEMENT

The present work embodies results of the research carried out by me at the Department of Chemistry, University of North Bengal, Darjeeling 734430, India.

At the first opportunity I would like to express my most sincere gratitude and profound thanks to my teacher, Dr. Bijan Das, Reader, Department of Chemistry, University of North Bengal, Darjeeling. Throughout my research period I received from him constant guidance, valuable suggestions and continued inspiration. Without his loving care this work could not be presented in this present form.

I also express my deep sense of gratitude to Prof. D. K. Hazra, Department of Chemistry, University of North Bengal for his invaluable assistance during the course of the work.

I am thankful to the University authorities for providing laboratory facilities. The assistance of University Scientific instrumentation centre, University of North Bengal is acknowledged with thanks.

Specific thanks are due to Headmaster, Gosanimari High School. Sri Ramendra Narayan De, for his help and cooperation during the progress of the work.

The inspiration and encouragement that I derived from my family, specially my wife Smt. Sibani Das, is most gracefully remembered. No word would be enough to pay back their contributions for the success of the present research programme.
