

# A C K N O W L E D G E M E N T

The work presented in this thesis was carried out in the Department of Chemistry, North Bengal University, Dt. Darjeeling, West Bengal, during the years 1977 to 1982.

The present thesis is based on the problem suggested by Mr. B. Majee, Reader in Chemistry, North Bengal University. I wish to acknowledge my deep sense of appreciation and gratitude to him for his guidance and encouragement throughout the progress of this work. Without his inspiration and profound knowledge it would have been impossible to complete the work.

I am grateful to Mr. C.K. Nayak and Mr. R. Samanta of Research Service Centre, North Bengal University for their sincere help and co-operation in computing the results presented in the thesis.

Lastly, I wish to thank the staff members of the Chemistry Department, Cotton College, Gauhati and the fellow Research Scholars of North Bengal University for their co-operation and inspiration.
