

A C K N O W L E D G E M E N T

It is a great pleasure on the part of the author to express his deep sense of gratitude to Dr. D.K.Hazra, Professor of Physical Chemistry, University of North Bengal for his able guidance, valuable suggestions and constant inspiration during the course of the work. Without his loving care it would not have been possible to present the thesis in its present form.

The author gratefully acknowledges the stimulus and aid coming from Prof. S.C. Lahiri, Department of Chemistry, University of Kalyani and owes much to him for his keen interest on the work. He is also indebted to Dr. Susanta Das, Instrumentation Officer, Department of Chemistry, University of North Bengal for his valuable assistance during the course of the work.

The author is thankful to the University authorities for providing laboratory facilities. The assistance of Research Service Centre (Computer), University of North Bengal is acknowledged with thanks. Specific thanks are due to Mr. T. Pandit and Mr. M. Chakraborty for the drawings and typographical works of the thesis. He is also grateful to the University Grants Commission, Govt. of India, for financial assistance.

It is impossible for him to express his indebtedness to those authors of monographs, articles etc. from which he has gained so much information. He can only hope that some measure of his gratitude is expressed by the references he has given to their works.
