

A C K N O W L E D G E M E N T

The present thesis embodies research carried out by me at the Department of Chemistry, University of North Bengal.

I would, at the first opportunity, like to express my profound thanks and deepest sense of gratitude to Mr. B. Majee, Reader in Chemistry, University of North Bengal for his active guidance and continuous supervision throughout the work presented in this thesis.

I would also like to thank the Head of the Department of Chemistry and the authorities of the University of North Bengal for providing research materials and cooperation in various ways.

Special thanks are due to the University Grants Commission, New Delhi for generous financial grants to Mr. B. Majee for purchase of the Microsystem on which all calculations of the present work are based.

Finally, I do cheerfully remember the much-needed inspiration and encouragement I derived from the members of my family during the research programme.
