ACKNOWLEDGEMENT ...	(i)
PREFACE ...	(ii) - (iv)
CONTENTS ...	(v) - (vii)

CHAPTER - I : Association complexes : A short review.

Section 1.1 : Association Complexes ...	1
1.2 : Types of molecules participating in molecular complex formation. ...	2
1.3 : Nature of bonding in Molecular or Association Complexes. ...	11
1.4 : Contact Charge-transfer Spectra. ...	21
1.5 : Experimental methods for the study of Donor - Acceptor Association Complexes. ...	23
<u>REFERENCES</u> :	35

CHAPTER - II : Electronic absorption spectra of azo dyes and their metal and organometallic derivatives.

Section 2.1: Introduction ...	42
2.2: The Azo group ...	42
2.3: Azobenzenes ...	45
2.4: Substituted Azobenzenes ...	48
2.5: Azo dyes ...	49
2.6: Electronic spectra of metal and organometallic derivatives of Azo dyes. ...	50
2.7: Solvent effect on the absorption spectra of Azo dyes. ...	53

	Page
CHAPTER - II : (Contd).....	
Section 2.8 : Solvent effect on the absorption spectra of metallic and organometallic derivatives of Azo dyes. ...	57
2.9 : Basicities of Azo dyes. ...	59
<u>REFERENCES</u> : ...	64
CHAPTER -III : Novel association complexes of Triorganotin- o-(aryl azo) benzoates.	
Section 3.1 : Introduction ...	66
3.2 : Structure and nomenclature of the compounds used in the present study. ...	67
3.3 : Electronic spectra of Me(o-4DMBB) in different solvents. ...	69
3.4 : Solvent effects on the absorption spectrum of Triorga- notin esters of methyl red. ...	72
3.5 : Further evidences for the forma- tion of association complexes. ...	79
3.6 : Stoichiometry of $\text{Ph}_3\text{Sn(o-4DMBB)}$ complexes. ...	82
3.7 : Estimation of true association constants (K_{DA}) ...	89
3.8 : Some preliminary comments on the nature of the complexes....	93
3.9 : Association complexes of some other organotin derivatives of methyl red. ...	96
3.10 : Concluding remarks. ...	101
<u>REFERENCES</u> : ...	103

	Page
CHAPTER - IV : Effect of protic solvents on the association complexes of Triorganotin-o-(aryl azo) benzoates.	
Section 4.1 : Introduction ...	106
4.2 : Effect of protic solvents on the absorption spectrum of Triorganotin-o-(aryl azo) benzoates - Acceptor systems. ...	106
4.3 : Stoichiometry of the protonated species and basicities of the organotin compounds. ...	113
4.4 : Evidence for the formation of species of the type $[A.OMe]^-$...	119
4.5 : A probable mechanism. ...	120
4.6 : Conductance of methanolic solutions. ...	125
4.7 : Behaviour of $R_3Sn(o-4DMBB)$ type compounds in pure methanol. ...	128
4.8 : Conclusion ...	129
<u>REFERENCES</u> :	132
<u>APPENDIX</u> :	133
