

A C K N O W L E D G E M E N T

I am exceedingly delighted in expressing my deep sense of gratitude to Dr. Dilip Kumar Hazra, professor of chemistry, University of North Bengal, Darjeeling, for his able guidance, valuable suggestions, constant inspiration and constructive criticism during the period of the work. Without his loving care and invaluable supervision it would not have been possible to prepare the thesis in its present form.

In connection with this thesis, I like to extend my acknowledgement to Dr. Debasis Nandi, Dr. Bijan Das and Mr. Prakash Kr. Muhuri for their valuable help during the course of the work.

Thankful acknowledgement is being made to the Head of the Department of Chemistry and University authorities for providing the necessary laboratory facilities and financial assistance.

Specific thanks are due to Mr. G. Isore and Mr. D. Ghosh for their drawings and typographical works of the thesis. I also convey my thanks to Mr. S. Manna and Mr. N. C. Roy for correcting manuscripts.

In the long run, I would like to acknowledge my thanks to my beloved wife, Madhabi for her sincere help, ceaseless inspiration and whole-hearted co-operation to complete the work con-

cerned with the thesis.
