

ACKNOWLEDGEMENT

The present thesis embodies the results of research work performed by the author at the Fungicidal Laboratory of Chemistry Department, North Bengal University, Darjeeling, India.

The author takes the first opportunity to express his gratefulness to Dr. A.K.Chosh, B.Sc., B.Phil, Professor of Chemistry, North Bengal University for his continuous interest and active guidance throughout the work.

The author is thankful to Mr. B.K.Bas, Reader in Chemistry, North Bengal University for his interest and encouragement.

The author wishes to express his gratitude and indebtedness to Indian Agricultural Research Institute, New Delhi, Forest Research Institute of Colleges, Bohra Dun and Botany Department of Burdwan University, West Bengal for helping the author to get the pure fungal cultures and for identification of fungal cultures isolated from the research samples.

The author is very much thankful to his fellow research workers Mr. S.K.Choudhury, Mr. S.Pal Choudhury, Mr. B.K.Neb,

(III)

Mr. H. Pramanick and Mr. A.K. Handi for their various helps during the entire period of research work.

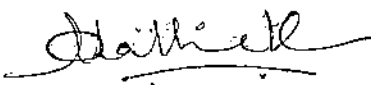

The author express his deep gratitude to Dr. A.K. Mallik, Dr. P.K. Mallik, Dr. B. Kumar and Miss K. Ghosh for their helpful inspiration during the entire period of research work.

The author is thankful to the University Grants Commission for a research fellowship and to the authorities of the University of North Bengal for laboratory facilities, etc.

Finally the author express his deep gratitude and indebtedness to his parents for their great inspirations.

Thanks to Mr. S. Chakrabarty for typing the manuscript.
