

## ACKNOWLEDGEMENTS

The present thesis embodies the results of the research carried out by the author at the Department of Chemistry, University of North Bengal, Raja Ramoharapur, Darjeeling.

The author takes this opportunity to express his sincere gratitude and deep appreciation to Dr. T.K. Das Gupta, Lecturer in Chemistry, North Bengal University, for stimulating discussion, constructive ideas, expert criticism and valuable guidance.

The author is indebted to Professor A. Eschenmoser, ETH, Zurich, for his valuable comments and Dr. D. Delix of the same institute for supplying an authentic sample of *N*-cyclohexylhydroxylamine-hydrochloride.

Thanks are also due to Dr. S.C. Roy, Reader in Chemistry, North Bengal University, for his enthusiastic support and to Professor A.K. Ghosh, Head of the Department of Chemistry of this University for his keen interest and for providing laboratory facilities.

The author is indebted to the authorities of the East India Pharmaceutical Works Ltd., Calcutta, for the award of a Junior Research Fellowship.

The author is also highly indebted to late Professor H.N.Khaetgir for his keen interest and encouragement.

The author express<sup>es</sup> his thanks to Mr. A.K.Handa and Mr. P.Roy for their kind cooperation.

Finally, the author express<sup>es</sup> his profound gratitude to his parents and Babloo for their inspiration and encouragement during the progress of the work.

A.R.Ghosh
