

LIST OF FIGURES

PART I

FIGURE		Page
2.1	Structure of some conjugated polyenes	33
2.2	Electronic absorption spectra of <u>all-trans</u> vitamin A alcohol at room temperature (25°C)	40
2.3	Electronic absorption spectra of <u>all-trans</u> vitamin A acetate at room temperature (25°C)	43
2.4	Electronic absorption spectra of β -apo-2'-carotenal at room temperature (25°C)	45
2.5	Electronic absorption spectra of astacene at room temperature (25°C)	47
2.6	Electronic absorption spectra of methyl bixin at room temperature (25°C)	50
2.7	Electronic absorption and emission spectra of vitamin A in ethyl acetate at room temperature (25°C)	53
2.8	Electronic absorption and emission spectra of <u>all-trans</u> vitamin A alcohol	55

FIGURE		Page
2.9	Electronic absorption and emission spectra of <u>all-trans</u> vitamin A acetate	56
2.10	Plots of $\bar{\nu}_{\max}$ against $(n^2-1)/(n^2+2)$ for the lowest energy absorption and the highest energy emission band of <u>all-trans</u> vitamin A alcohol	60
2.11	Plots of $\bar{\nu}_{\max}$ against $(n^2-1)/(n^2+2)$ for the lowest energy absorption band and the highest energy emission band of <u>all-trans</u> vitamin A acetate	62
2.12	Plots of $\bar{\nu}_{\max}$ against $(n^2-1)/(n^2+2)$ for the lowest energy absorption band and the highest energy emission band of β -apo-8'-carotenal	64
2.13	Plots of $\bar{\nu}_{\max}$ against $(n^2-1)/(n^2+2)$ for the lowest energy absorption band and the highest energy emission band of astaxene	66
2.14	Plots of $\bar{\nu}_{\max}$ against $(n^2-1)/(n^2+2)$ for the lowest energy absorption band and the highest energy emission band of methyl bixin	68

FIGURE		Page
3.1	Structure of <u>all-trans</u> β -carotene	77
3.2	Electronic absorption spectra of <u>all-trans</u> - β -carotene solid film at 28°C after adsorption of different electron acceptor vapours	78
3.3	Electronic absorption spectra of β -apo-8'-carotenal solid film at 28°C after adsorption of different electron acceptor vapours	79
3.4	Electronic absorption spectra of astacene solid film at 28°C after adsorption of different electron acceptor vapours	80
3.5	Electronic absorption spectra of methyl bixin solid film at 28°C after adsorption of different electron acceptor vapours	81
3.6	Enhancement of the intensity of the new band with the amount of adsorbed acceptor molecules on the solid film of <u>all-trans</u> β -carotene at 28°C	83

FIGURE		Page
3.7	Enhancement of the intensity of the new band with the amount of adsorbed acceptor molecules on the solid film of β -apo-8'-carotenol at 28°C ...	84
3.8	Enhancement of the intensity of the new band with the amount of adsorbed acceptor molecules on the solid film of astaxene at 28°C ...	85
3.9	Enhancement of the intensity of the new band with the amount of adsorbed acceptor molecules on the solid film of methyl bixin ...	86
3.10	Plot of $\bar{\nu}_{\max}$ against E_A for <u>all-trans</u> - β -carotene ...	89
3.11	Plot of $\bar{\nu}_{CT}$ against I_D for CT complexes of a number of donors with iodine acceptor ...	92
3.12	Electronic absorption spectra of <u>all-trans</u> - β -carotene solid film after I_2 vapour adsorption ...	94
3.13	Electronic absorption spectra of β -apo-8'-carotenol solid film after I_2 -vapour adsorption ...	95

FIGURE		Page
3.14	Electronic absorption spectra of astacene solid film after I ₂ vapour adsorption	... 96
3.15	Electronic absorption spectra of methyl bisin solid film (28°C) after I ₂ vapour adsorption	... 97

PART II

1.1	Tunnel model of an organic semiconductor	... 113
2.1	A schematic diagram of the apparatus used	... 132
3.1	The change in dark current in vitamin A alcohol with (a) adsorption and (b) desorption of ethyl acetate vapour	... 139
3.2	The change in dark current in vitamin A acetate with (a) adsorption and (b) desorption of ethyl acetate vapour	... 141

FIGURE		Page
3.3	The change in dark current in β -apo-8'-carotenal with (a) adsorption and (b) desorption of ethyl acetate vapour	... 142
3.4	The change in dark current in astacene with (a) adsorption and (b) desorption of ethyl acetate vapour	... 143
3.5	The change in dark current in methylixin with (a) adsorption and (b) desorption of ethyl acetate vapour	... 144
3.6	The change in dark current in vitamin A alcohol after adsorption of ethyl acetate vapour at different pressures	... 148
3.7	The change in dark current in vitamin A acetate after adsorption of ethyl acetate vapour at different pressures	... 149
3.8	The change in dark current in β -apo-8'-carotenal after adsorption of ethyl acetate vapour at different pressures	... 150

FIGURE		Page
3.9	The change in dark current in astacene after adsorption of ethyl acetate vapour at different pressures ...	151
3.10	The change in dark current in methyl bixin after adsorption of ethyl acetate vapour at different pressures ...	152
3.11	Change in the dark current of vitamin A (alcohol and acetate) as a function of the vapour pressure of ethyl acetate ...	155
3.12	Change in the dark current of β -apo-8'-carotenal, astacene and methyl bixin as a function of the vapour pressure of ethyl acetate ...	156
3.13	Adsorption kinetics data plotted according to R - Z equation for vitamin A alcohol ...	157
3.14	Adsorption kinetics data plotted according to R - Z equation for vitamin A acetate ...	158

FIGURE		Page
3.15	Absorption kinetics data plotted according to R-Z equation for β -apo-8'-carotenal ...	159
3.16	Absorption kinetics data plotted according to R-Z equation for astacene ...	160
3.17	Absorption kinetics data plotted according to R-Z equation for methyl bixin ...	161
3.18	Desorption kinetics data plotted according to R-Z equation for vitamin A alcohol ...	165
3.19	Desorption kinetics data plotted according to R-Z equation for vitamin A acetate ...	166
3.20	Desorption kinetics data plotted according to R-Z equation for β -apo-8'-carotenal ...	167
3.21	Desorption kinetics data plotted according to R-Z equation for astacene ...	168
3.22	Desorption kinetics data plotted according to R-Z equation for methyl bixin ...	169

FIGURE		Page
3.23	Potential energy curves for two-stage vapour adsorption	173
4.1	Semiconductivity in an ethyl acetate adsorbed vitamin A acetate.	183
4.2	Semiconductivity in an ethyl acetate adsorbed vitamin A alcohol	185
4.3	Semiconductivity in an ethyl acetate adsorbed β -apo-8'-carotenal	186
4.4	Semiconductivity in an ethyl acetate adsorbed astacene	187
4.5	Semiconductivity in an ethyl acetate adsorbed methyl bixin	188
4.6	Semiconductivity in vitamin A alcohol with the adsorption of different vapours	190
4.7	Semiconductivity in vitamin A acetate with the adsorption of different vapours	191
4.8	Semiconductivity in β -apo-8'-carotenal with the adsorption of different vapours	192

FIGURE		Page
4.9	Semiconductivity in astacene with the adsorption of different vapour	... 193
4.10	Semiconductivity in methyl bixin with the adsorption of different vapours	... 194
4.11	Semiconductivity data for vitamin A alcohol with the adsorption of different amounts of ethyl acetate vapour	... 195
4.12	Semiconductivity data for vitamin A acetate with the adsorption of different amounts of ethyl acetate vapour	... 196
4.13	Semiconductivity data for β -apo-8'-carotenal with the adsorption of different amounts of ethyl acetate vapour	... 198
4.14	Semiconductivity data for astacene with the adsorption of different amounts of ethyl acetate vapour	... 199

FIGURE		Page
4.15	Semiconductivity data for methyl bixin with the adsorption of different amounts of ethanol vapour	200
4.16	Plots of $\log \sigma_0$ against E for vitamin A (alcohol and acetate)	203
4.17	Plot of $\log \sigma_0$ against E for β -apo-8'-carotenal	204
4.18	Plot of $\log \sigma_0$ against E for astacene	205
4.19	Plot of $\log \sigma_0$ against E for methyl bixin	206
4.20	Plots of $\log \sigma$ vs. E for vitamin A (alcohol and acetate) at a constant temperature	218
4.21	Plot of $\log \sigma$ vs. E for β -apo-8'- carotenal at a constant temperature	219
4.22	Plot of $\log \sigma$ vs. E for astacene at a constant temperature	220
4.23	Plot of $\log \sigma$ vs. E for methyl bixin at a constant temperature	221
