Acknowledgement	i
Contents	ii-iii
Chapter – 1	1-11
Introduction	2
References	8
Chapter – 2	12-16
Scope and Object	
Chapter – 3	17-69
Protonation-deprotonation equilibrium of OH groups of biologically important indicator molecules in micellar media	
3.1. Introduction and review of the previous works	18
3.2. Experimental	35
3.3. Result and discussion	39
3.3.1. Ultraviolet absorption spectral study of protonation-deprotonation equilibrium of 5-Hydroxyindole and 5-Hydroxy-L-Tryptophan	40
3.3.2. Ultraviolet absorption spectral study of protonation-deprotonation equilibrium of L-Tyrosine and L-Tyrosine methyl ester	45
3.3.3. Ultraviolet absorption spectral study of protonation-deprotonation equilibrium of 1-Naphthol and 2-Naphthol	48
References	65
Chapter – 4	70-96
Photophysical properties of indicator molecules in different dielectric media	
4.1. Introduction and review of the previous works	71
4.2. Experimental	79
4.3. Results and discussion	79
References	95

Chapter – 5	97-120
Promotion of micellar shape transition of cationic surfactants by selected indicator molecules	
5.1. Introduction and review of the previous works	98
5.2. Experimental	105
5.3. Results and discussion	106
References	114
Chapter – 6	121-132
Summary and conclusion
