

C O N T E N T S

	Page
CHAPTER - I (Review)	
1. Introduction ..	1
2. Synthesis of Nitrones ..	2
3. Reactions of Nitrones ..	9
4. Cycloadditions of Nitrones ..	13
5. Stereochemistry of addition	16
6. 1,3-Dipolar Cycloadditions (mechanism) ..	19
CHAPTER - II	
Scope, Objective and Summary of the work	35
CHAPTER - III (Results & Discussions)	
1. General Discussion ..	40
2. Interpretation of NMR Spectra	56
3. Interpretation of Mass Spectra	60
CHAPTER - IV (Experimental)	
1. Preparation of N-Cyclohexyl- hydroxylamine ..	67
2. Preparation of N-Cyclohexyl- methylene nitrone ..	69
3. Reaction with Acrylonitrile	73
4. Reaction with Methylacrylate	74
5. Reaction with Methylcrotonate	76

	Page
6. Reaction with Methylcinnamate	77
7. Reaction with Coumarin ..	80
8. Hydrolysis of Acrylonitrile adduct ..	82
9. Reaction with TCNE ..	83
10. Reaction with p-benzoquinone	85
11. Reaction with Chloroacrylonitrile	86
12. Hydrolysis of the Chloroacrylonitrile adduct - mixture ..	87
13. Reaction with Styrene ..	88
14. Reaction with Acenaphthalene	90
15. Reaction with Cyclohexene ..	92
16. Reaction with Methylene Cyclopentane	94
17. Reaction with Ethyl Vinyl Ether	95
18. Reaction with 2,3-Dihydropyran	97
19. Reaction with Cyclooctatetraene	98
20. Reaction with Dimethylacetylene Dicarboxylate ..	100
21. Reaction with Methyl Propiolate	101
References ..	103
