ACKNOWLEDGEMENT

A plethora of environmental problems awaits diagnosis and appropriate ameliorative measures in this planet. Generation of sufficient specific information on species, habitats and ecosystems is necessary to develop adequate critical understanding in order to be able to predict the ecological changes, and to evolve ecological sustainable ways to conserve the ecosystems, and ultimately the biosphere. In my work, I have dared in revealing such a problem.

Standing at this point, I feel towards those who have a guiding light and source of inspiration towards the initiation and completion of this small piece of research work, though, within this limited space, it is not possible to acknowledge each and every one of them by name.

With my deep sense of gratitude, I express my heartfelt indebtedness to my research guide, Dr. A.P. Das, Professor of Botany, University of North Bengal, Darjeeling for suggesting me the problem and for his esteemed supervision, excellent guidance, constant encouragement, valuable suggestions and tremendous help throughout the period of investigation. His curiosity and genuine interest in the subject has helped me a lot to complete the work in scheduled time. I express my sincere thanks and regards for him.

I express my gratefulness to the Indian Council for Cultural Relations of the Ministry of Foreign Affairs, Government of India for awarding me a research fellowship and other financial assistance.

Similarly, I am also very much grateful to the Government of the People's Republic of Bangladesh for sanctioning deputation during the period of my research work.

I feel pleasure in extending my sincere thanks to Professor P.K. Sarkar, Head, Department of Botany, North Bengal University, Darjeeling for his continuous enquiry, encouragement and help during the study period.

I offer my thanks and respects to Dr. K.B. Datta (formerly Professor of Botany, University of North Bengal) for creative suggestions, valuable comments, full-hearted helps and encouragements and also for providing facilities for tissue cultural works in his laboratory.

I am also indebted to all other teachers of the Department of Botany, North Bengal University, namely Professor P.K. Basu, Professor B.N. Chakraborty, Dr. U. Chakraborty, Dr. A. Saha, Dr. R. Chakraborty and Dr. A. Sen for rendering every possible helps and encouragement for completing the work. I also like to extend my thanks to all office and laboratory staff of the Department of Botany for their untiring help and assistance.

I always cherish a deep sense of admiration and gratitude to my respected teacher, Professor A.K.M. Nazrul Islam, Department of Botany, University of Dhaka for his kind hearted encouragement, valuable suggestions and heartfelt love, which I always received and enjoyed.
With thanks I acknowledge the help and assistance extended by the Head of the Department of Chemistry, N.B.U., permitting me to work in the department's soil chemistry laboratory for the analysis of soil samples. I am also thankful to Dr. Paria, Scientific Officer in Charge of the Soil Chemistry Laboratory for his help during soil analysis.

I also thankfully acknowledge assistance of the Scientist in Charge, Flood Meteorology Station, Jalpaiguri for providing climatic data of the relevant area.

I am also thankful to the Director, Botanical Survey of India for permitting me to use the Central National Herbarium (CAL) for the identification and verification of some of my specimens.

My sincere thanks are also due to my colleagues in the Taxonomy and Environmental Biology Laboratory, including, Dr. A. Acharyya, Dr. R. B. Bhujel, Dr. S.E. Kabir, Dr. A.K. Samanta, Mr. S. Mukhopadhyay, Mr. P.C. Rai, Mr. A. Sarkar, Mr. D. Lama, Sm. S. Tamang, Mr. U. Rai, Sm. B.D. Sharma, as well as to all my colleagues in other laboratories in the Department of Botany in particular and Centre for Life Sciences in general for their various types of helps and encouragements. I am specially thankful to Mr. B. Kanjilal for assisting me in the in vitro regeneration works. With this, I also like to thank some of the students of the Department of Botany, particularly, Malay Bhattacharyya, Jayeeta Mitra, S. Majumder, Santana Roy, Sanchita Biswas, Sikha Mandal, Renu Minda, Bidisha Biswas, Susmita Roy and others for various kinds of help during my work.

My special thanks goes to Mr. Nabin Singha for his untiring help in my field and laboratory works. He was my constant companion in my field works, which comprised the major part of my research programme. Thanks also to Dipanwita for computation of the works from my hand written manuscripts.

I shall always remain grateful to my senior colleague Mr. A.F.M. Yahiya Chowdhury, ex-Commissioner, Rajshahi Division, his wife Mrs. Sitara Chowdhury and also to Mr. S.M. Zahidur Rahman, Director, Ministry of Foreign Affairs, Bangladesh for their valuable suggestions and encouragement.

With feelings of gratitude I shall always remember my uncles (Bara Abba) late Md Abdul Jalil Sarker and late Md. Nurul Islam for their encouragement and inspiration from my student life to the initiation of this work. I express my regards for them and pray to Allah for their Behesth life.

I remember my father with heartfelt love and respect, who is, in fact, my friend, philosopher and guide, Alhaj Md. Abul Quasem Mian, whose tireless assistance, constant inspiration, kind patronage and robust encouragement, all of which enabled me to overcome the obstacles of my life and finally helped me to scale up to this height of success.
My greatest debts are due to my mother Mrs. Oommay Solaima, who always blesses me to be a man with utmost sincerity and devotion to the duties. I also remember various kinds of supports and encouragements I received from my brothers Dr. Musa, and Mizan, sisters Hashi, Ratna and Rita and also to brother-in-law Mahbubh and Shawpan without which it was almost impossible for me to reach to this happy end of my endeavour.

I am also grateful to my father-in-law Professor Sah Alam Khondoker and Mother-in-law Mrs. Shafer Banu and also to my respected uncles Mr. Md. Abdul Matin, Mr. Md. Khairul Alam, Mr. Md. Ashraful Alam and Mr. Jainal Abeddin for their continuous encouragement and heartfelt love.

With this I like to extend my hearty thanks to my dear colleagues and friends Mr. Rana, Mr. Ahsan, Mr. Bizon, Mr. Mazid, Mr. Emdad, Mr. Fazlul Karim, Mr. Akhtar Ali Sarkar, Mr. Motiar Rahman, Mr. Borhan Uddin, Mr. Anis, Mosarraf, Mr. Salimullah, Mr. Mahmud, Mr. Halim, Mrs. Sahnaj and Mr. Ajam for their moral support and encouragement.

I am immensely thankful to Boudi, Mrs. Ruby Das for her continuous encouragement and affectionate care, which always inspired me to complete the work.

At last, but can never be the least, I can not forget to thank my beloved wife, Shathi, who helped me in all respects and without her efforts and supports this work would not have been a reality, though I failed to do my domestic duties. — With this, I cannot forget my loving sons, Anupan and Joy, who always kept me undisturbed but sometimes provided excellent company and needful stimulation for my works. I feel sorry for them as I could spend very little time in their heavenly company. I realised how they were missing me when my company to them was really essential.

Above all, my words are insufficient to express my boundless gratitude to the “Allmighty Allah” for the tremendous blessings showered upon me in every walks of my life.

North Bengal University,
Darjeeling, India

[A. F. M. Manzur Kadir]
