

CONTENTS

1. Introduction	1-3
2. Review of Literature	4 - 46
3. Materials and Methods	47-73
3.1. Plant material	47
3.1.1. Collection	47
3.1.2. Propagation.....	47
3.1.3. Maintenance of tea sleeves in nursery.....	47
3.1.4. Plantation.....	48
3.2. Fungal culture.....	50
3.2.1. Source of cultures.....	50
3.2.2. Assessment of mycelial growth.....	51
3.2.2.1 Solid media.....	51
3.2.2.2. Liquid media.....	52
3.3. Inoculation technique.....	52
3.3.1. Preparation of inoculum.....	52
3.3.2. Inoculation of healthy tea plants.....	53
3.3.2.1. Pot grown plants.....	53
3.3.2.2. Field grown plants.....	53
3.4. Disease assessment.....	53
3.5. Soluble protein.....	54
3.5.1. Extraction.....	54
3.5.1.1. Mycelia.....	54
3.5.1.2. Root.....	54
3.5.2 Estimation.....	54
3.6. SDS PAGE analysis of total soluble protein.....	55
3.6.1. Preparation of stock solution.....	55
3.6.2. Preparation of gel.....	56
3.6.3. Sample preparation.....	57
3.6.4. Electrophoresis.....	58
3.6.5. Fixing and Staining.....	58
3.7 Preparation of antigens.....	58
3.7.1. Fungal antigen.....	58
3.7.1.1. Mycelia.....	58
3.7.1.2. Cell wall	58
3.7.1.3. Spore.....	59
3.7.1.4. Culture filtrate.....	59

II

3.7.2. Root antigen.....	59
3.7.3. Soil antigen.....	59
3.8. Cell wall characterization.....	60
3.8.1. Preparation of cell wall extract.....	60
3.8.2. Protein estimation.....	60
3.8.3. Carbohydrate estimation.....	60
3.8.4. SDS-PAGE analysis.....	60
3.8.5. Binding of conA FITC labeled concanavalin-A.....	61
3.9. Agglutination response of conidia.....	62
3.9.1. Preparation of conidial suspension.....	62
3.9.2. Agglutination test.....	62
3.10. Serology.....	62
3.10.1. Rabbits and their maintenance.....	62
3.10.2. Immunization.....	63
3.10.3. Bleeding.....	63
3.10.4. Purification of IgG.....	63
3.10.4.1. Precipitation.....	63
3.10.4.2. Column preparation.....	64
3.10.4.3. Fraction collection.....	64
3.10.4.4. Estimation of IgG concentration.....	64
3.11. Immunodiffusion.....	64
3.11.1. Preparation of agarose slides.....	64
3.11.2. Diffusion.....	65
3.11.2. Wasing, staining and drying.....	65
3.12. Enzyme linked immunosorbent assay (ELISA).....	65
3.12.1. Direct antigen coating (DAC) ELISA.....	66
3.12.2. Double antibody sandwich (DAS)ELISA.....	67
3.12.3. Competition ELISA.....	67
3.13. Immunoblotting.....	68
3.13.1. Dot-blot.....	68
3.13.2. Western blotting.....	69
3.13.2.1. SDS-PAGE.....	70
3.13.2.2. Transfer process.....	70
3.13.2.3. Immunoprobng.....	71
3.14. Fluorescence antibody staining and microscopy.....	71
3.14.1. Mycelia.....	71
3.14.2. Spore.....	71

III

3.14.3. Cross section of tea root.....	72
3.15. Immunocytochemical staining.....	73
4. Experimental	74-148
4.1. Violet root rot incidence	74
4.2. Cultural conditions affecting growth of <i>S.repens</i>	74
4.2.1. Media	74
4.2.2. Incubation period.....	78
4.2.3. pH.....	78
4.2.4. Carbon source.....	80
4.2.5. Nitrogen source.....	80
4.3. Pathogenicity test of <i>S. repens</i> on different tea varieties.....	89
4.4. Immunodiffusion	90
4.5. Enzyme Linked Immunosorbent Assay (ELISA).....	90
4.5.1. Optimization.....	90
4.5.1.1. PAb raised against mycelia of <i>S. repens</i>	92
4.5.1.1.1. Antiserum dilution.....	92
4.5.1.1.1. Antigen dilution.....	92
4.5.1.2. PAb raised against cell wall of <i>S. repens</i>	92
4.5.1.2.1. Antiserum dilution.....	92
4.5.1.2.1. Antigen dilution.....	95
4.5.1.3. PAb raised against spore of <i>S. repens</i>	96
4.5.1.4. Pab raised against tea root	96
4.5.2. Detection of cross reactive antigens between <i>S.repens</i> and tea roots	97
4.5.2.1. PAb of <i>S.repens</i>	98
4.5.2.1.1. Mycelia.....	98
4.5.2.1.2. Cell wall.....	98
4.5.2.1.3. Spore.....	98
4.5.2.2. Detection of cross reactive antigens among tea roots.....	101
4.5.3. Determination of cross reactivity of <i>S. repens</i> with different soil fungi.	101
4.5.4. Detction of <i>S. repens</i> in tea root tissues.....	103
4.5.4.1. . PAb raised against mycelia	113
4.5.4.2. . PAb raised against cell wall.....	115
4.5.4.3. . PAb raised against spores.....	118

IV

4.5.5. Detection of infection with other pathogens in tea roots using Pab of <i>S. repens</i>	118
4.5.5. Detection of <i>S. repens</i> in soil.....	118
4.6. Analysis of proteins in mycelia and tea roots following infection.....	121
4.6.1. Protein content.....	122
4.6.2. SDS-PAGE analysis.....	123
4.7. Characterization of mycelial and conidial wall of <i>S. repens</i> ..	123
4.7.1. Mycelial wall.....	123
4.7.1.1. SDS PAGE.....	123
4.7.1.2. ConA FITC binding.....	125
4.7.2. Conidial wall.....	125
4.7.2.1. ConA FITC binding	125
4.7.2.2. Agglutination.....	125
4.8. Immunoblotting.....	129
4.8.1. Dot-blot.....	129
4.8.2. Western blotting.....	132
4.9. Immunofluorescence.....	133
4.9.1. Mycelia	135
4.9.2. Spore.....	135
4.9.3. Root tissue.....	135
4.10. Immunocytochemical staining.....	135
4.11. Biological control of violet root rot disease with <i>Trichoderma</i> sp.....	138
4.11.1. <i>In vitro</i> test.....	138
4.11.2. <i>In vivo</i> test.....	138
4.11.2.1. Potted plants.....	140
4.11.2.2. Field grown plants.....	140
4.12. Detection of <i>S. repens</i> in tea root and soil following treatment with biocontrol agents.....	142
4.12.1. ELISA.....	142
4.12.1.1. Root tissue.....	143
4.12.1.2. Soil.....	143
4.12.2. Dot-blot.....	146
5. Discussion.....	149 - 159
6. Summary.....	160 - 162
7. References	163 -177
