*“Where the mind is without fear
and the head is held high;
Where knowledge is free;
Where the world has not been broken
up into fragments by narrow domestic
walls;
Where words come out from the
depth of truth;
Where tireless striving
Stretches its arms towards
Perfection;
Where the clear stream of reason
Has not lost its way into the
dreary desert sand of dead habit;
Where the mind is led forward
by thee into ever-widening thought and action-
into that heaven of freedom,
my Father,
let my country awake”.*

— Rabindranath Tagore

These words of Gurudev, always had been the source of inspiration, since my early childhood days, to shape myself to pursue “my voyage through the wilderness of world’s leaving my track on many a star and planet”.... As a traveler, I had to knock at so many alien doors.... When, I try to write a few words to express my sincere gratitude and indebtedness to those persons, who have contributed a lot, to make my journey a comfortable one, with their kind co-operations, critical analyses and helpful suggestions along with constructive discussions, I realize that, the list will be endless....

I recall those days in the Microbiology Laboratory of the Department of Botany, North Bengal University, when I would have been completely lost without the able guidance and encouragement of Dr. Ranadhir Chakraborty (Sir), a sincere researcher, who has always showed me the ways, to be on the right track in the field of the search for the truth. He had all along being a source of encouragement to me, going through the entire manuscript with meticulous care and offering important suggestions, while this work was in progress. There were times, when we disagreed, but he always gave me that academic freedom which every serious researcher would like to have. He was the one, who completely molded my ways, timed my duties and gave me the strength to fight in every tough situation that often created hindrances throughout the journey. It is difficult for me to write in few words my gratitude towards him...It is me and only me who knows how I gratefully acknowledge him for providing me an interesting research program, his whole hearted involvement in carrying out the research works.

I would like to convey my sincere gratitude to Dr. Pranabesh Sanyal, the then Chief Environment Officer, Department of Environment, West Bengal, who along with Dr. Dipankar Chakraborty of Jadavpur University helped me immensely to make my journey a successful one.

I owe special gratitude to Dr. late Prodosh Roy, Reader, Department of Microbiology, Bose Institute, Kolkata. His active participation, valuable criticism, scientific advice has enriched each and every sector of this research.

Words are insufficient to thank or acknowledge Dr. Chirojyoti Deb (Chiroda), for relieving me in the most competent and helpful way by guiding me time to time and never turning away from the

countless queries and problems that I have plagued him with. Without Chiroda, the destiny of my Ph.D. career could have been seriously affected.

My special thanks to Mr. Manik Saha and Mrs. Sumita Saha, whose spontaneous help in days of crucial crisis is a classical example of human value.

It gives me immense pleasure to express my grateful indebtedness to Dr. C. R. Nayek of Department of Computer science, North Bengal University, who has shouldered all the responsibilities in preparing the statistical analyses of the data generated from the yearlong analyses of Torsa river water.

I am grateful Dr. T. K. Choudhury, Reader, Department of Zoology, North Bengal University, for providing infrastructural support for carrying out various works related to the research program.

I must acknowledge my indebtedness to Dr. Soumitra Dey (Pinkuda) for taking great pains to go through my papers, time and again. He had always given me valuable suggestions that have proved to be very useful to me.

I express my sincere thanks to all the teaching and non-teaching staff of the Department of Botany, North Bengal University. With a deep sense of gratitude I thank all my teachers, Prof. P. K. Basu, Prof. P. K. Sarkar, Prof. B. N. Chakraborty, Prof. A. P. Das, Prof. U. Chakraborty, Dr. Anirudhha Saha, Dr. Arnab Sen and Mr. P. Mandal, for their kind cooperation and valuable suggestions.

This thesis has benefited from the enthusiasm and assistance of my labmates. Hence, words are insufficient to thank for their untiring exercise of scientific interactions. All of them in course of giving encouragements have also supported me to go on discussions for hours on the perspective of research and contemporary science. My thanks to Bhaskar Bhadra, Anirudra Gurung, Suparna Bhowal and also to Manojit and Bikash, as they have associated themselves to my work whenever I needed them, leaving their own assignments. I acknowledge the proficient assistance and co-operation rendered by Papai Singha.

I greatly appreciate the sincerity of my friend Shankar, who has co-operated in various ways and had given constant encouragements. Thanks to Debashish for his assistance in proper handling of the computers.

I would like to extend the hand of special thanks to my didi, Sharbari, who has been the source of inspiration and courage from my very childhood days. Without her guidance, views and assistance I could never have faced the most crucial stages of my journey unflinchingly. My humble gratitude to Pradyutda, for being there just like a brother, by taking up many painful responsibilities and providing me with the utmost support in times of need. Bhai was always there....boosting me in his humorous ways, time to time.

My sweet little Mamai had always played the role of 'Professor Shanku', being enthusiastic enough about the ongoing research work and always tried hard to incorporate her imaginary ideas to upgrade the quality of the research program.

To my parents, I need not make any formal statement of debt. They have played the key role behind the screen. They patiently have borne all my inconveniences from time to time and positively encouraged in carrying out and completing my work. My formal statements will be few compared to their contribution in my journey, now and always....

Last, but never the least, my grateful acknowledgement to all those numerous researchers and their valuable research papers.
