29.10.1998

This is to certify that Smt. Anuradha Rai, MSc. worked in my laboratory since December 1991. She carried out her work initially on a part time basis and completed the major part of her work after being granted one year FIP fellowship and leave by the UGC from 15.11.1995 to 14.11.1996. She worked on the topic "Activated Natural Killer Cell Mediated Cytotoxicity of Fibrosarcoma Cells in Mouse" for fulfilment of the requirements of the Degree of Doctor of Philosophy (Science) of the University of North Bengal.

Smt. Rai performed all the experiments thoroughly and meticulously. She is conversant with the techniques and literature cited in the dissertation. It seems that the thesis is fit for submission for Ph.D and she is worthy for award of the degree.

  
Prof. A.K. Chakravarty
