General Introduction	1
Microbial metal resistance mechanisms:	1
Nickel resistance in bacteria:	2
Chapter 1: Physico-Chemical and Sanitary status analysis of Torsa river water:	6
1.1. Sampling stations and sample collection from the river water:	7
1.1.1. Selection of sampling stations on Torsa River:	7
1.1.2. Sample collection:	9
1.2. Physico-chemical analysis of water samples:	
1.2.1. Materials and Methods:	10
1.2.1.1. Temperature:	10
1.2.1.2. pH:	10
1.2.1.3. Conductivity:	10
1.2.1.4. Total Dissolved Solid (TDS):	10
1.2.1.5. Total Suspended Solid (TSS):	10
1.2.1.6. Dissolved Oxygen (DO):	10
1.2.1.7. Chloride (Cl ⁻):	10
1.2.1.8. Detergents (anionic and cationic):	10
1.2.1.9. Total Alkalinity:	10
1.2.1.10. Turbidity:	10
1.2.1.11. Biochemical Oxygen Demand (BOD):	11
1.2.1.12. Chemical Oxygen Demand (COD):	11
1.2.1.13. Total Ammonia 'N' content:	11
1.2.1.14. Total Phosphorus:	11
1.2.1.15. Nitrate 'N':	11
1.2.1.16. Nitrite 'N':	11
1.2.1.17. Silica:	11
1.2.1.18. Total Hardness:	12
1.2.1.19. Calcium Hardness:	12
1.2.1.20. Magnesium Hardness:	12
1.2.1.21. Statistical Analysis:	12
1.2.2. Results and discussion:	12
1.2.2.1. Temperature:	12
1.2.2.2. pH:	12
1.2.2.3. Conductivity:	12
1.2.2.4. Total Dissolved Solid (TDS):	13
1.2.2.5. Total Suspended Solid (TSS):	13
1.2.2.6. Dissolved Oxygen (DO):	13
1.2.2.7. Chloride:	13
1.2.2.8. Detergents (anionic and cationic):	14
1.2.2.9. Total Alkalinity:	14
1.2.2.10. Turbidity:	14
1.2.2.11. Biochemical Oxygen Demand (BOD):	14
1.2.2.12. Chemical Oxygen Demand (COD):	14
1.2.2.13. Total Ammonia 'N':	15
1.2.2.14. Total Phosphates:	15
1.2.2.15. Nitrate 'N':	15
1.2.2.16. Nitrite 'N':	15
1.2.2.17. Total Silica:	15

1.2.2.18. Total Hardness:	18
1.2.2.19. Calcium and Magnesium hardness:	18
1.2.2.20. Statistical analysis of Physico-chemical data:	19
1.2.3. Conclusion:	19
1.3. Sanitary quality of Torsa River water:	20
1.3.1. Materials and methods:	21
1.3.1.1. Collection of sample:	21
1.3.1.2. Standard Total Coliform MPN test:	21
1.3.1.2.1. Presumptive test:	21
1.3.1.2.2. Confirmed test:	22
1.3.1.2.3. Completed test:	23
1.3.1.3. Fecal Coliform MPN procedure:	23
1.3.1.4. Estimation of Fecal Streptococci:	23
1.3.2. Results and discussion:	23
1.3.2.1. Total Coliform (TC):	23
1.3.2.2. Fecal Coliform (FC):	23
1.3.2.3. Fecal Streptococci (FS):	24
1.3.3. Conclusion:	24
1.4. Determination of water quality index of Torsa River:	24
1.5. Summary of the Chapter 1:	24
<i>Chapter 2. Dynamics of metal resistant copiotrophic bacteria and heavy metal content analysis of Torsa River:</i>	25
2.1. Investigation on Heavy Metal ion content of Torsa River water:	25
2.1.1. Introduction:	25
2.1.2. Materials and Methods:	26
2.1.2.1. Water sampling:	26
2.1.2.2. Sample preservation:	26
2.1.2.3. Reagents and Chemicals:	26
2.1.2.4. Analysis of samples:	26
2.1.3. Results and discussion:	26
2.2. Dynamics of Nickel, Cobalt and Zinc resistant copiotrophic bacteria:	27
2.2.1. Introduction:	27
2.2.2. Materials and Methods:	28
2.2.2.1. Sample collection:	28
2.2.2.2. Bacterial cultures and media used:	29
2.2.2.3. Enumeration of nickel, cobalt, copper and zinc resistant copiotrophic bacteria:	29
2.2.2.4. Determination of MTC of selected nickel resistant isolates:	29
2.2.2.5. Statistical analysis:	30
2.2.3. Results and Discussions:	30
2.2.3.1. Isolation and quantification of metal resistant copiotrophic bacteria:	30
2.2.3.2. Determination of multiple metal resistant profiles of selected nickel resistant strains:	31
2.2.3.3. Correlation between Metal content and Metal resistant bacterial population:	31
2.3. Conclusion:	31
2.4. Summary of Chapter 2:	
<i>Chapter 3: Screening of Gram-negative nickel resistant isolates of Torsa River for the presence of nickel resistance genes by PCR method:</i>	31
3.1. Introduction:	34
3.1.1. Nickel:	34
3.1.2. Bimolecular activity of nickel:	34
3.1.2.1. Nickel uptake systems in bacteria:	34

3.1.2.2. Biological role of nickel as a trace metal:	35
3.1.2.3. Nickel toxicity in microbes and the mechanisms to overcome Ni-toxicity:	36
3.1.3. Nickel resistance genetic systems in bacteria:	37
3.1.3.1. Cobalt-Nickel resistance operon <i>-cnr</i> :	37
3.1.3.2. Nickel-Cobalt-Cadmium-resistance operon <i>-ncc</i> :	38
3.1.3.3. Nickel resistance system <i>-nrs</i> :	38
3.1.3.4. Nickel resistance operon <i>-nre</i> :	38
3.1.3.5. Nickel-Cobalt resistance determinant <i>ncr</i> :	39
3.1.3.6. Nickel resistance determinant <i>nir</i> :	39
3.1.4. Objective of the study:	39
3.2. Materials and methods:	39
3.2.1. Bacterial strains:	39
3.2.2. Isolation of total genomic DNA:	39
3.2.3. Oligonucleotide primers:	40
3.2.3.1. Primer for amplification of <i>cnr</i> and <i>ncc</i> determinants:	40
3.2.3.2. Primer for amplification of <i>nre</i> determinant:	40
3.2.3.3. Primer for amplification of <i>ncr</i> and <i>nir</i> determinants:	40
3.2.3.4. Primer for amplification of <i>czc</i> homologous determinant:	41
3.2.4. PCR amplification:	41
3.2.5. Size determination and restriction digestion of PCR products:	41
3.2.6. Sequencing of the PCR products:	41
3.3. Results and discussion:	42
3.3.1. Amplification with <i>bbrc1- bbrc2</i> primers and restriction analysis of some amplicons:	42
3.3.2. Sequencing and sequence analysis of the amplicon-generated from the strain BB1A using <i>bbrc1-bbrc2</i> primers:	42
3.3.3. Amplification with <i>czc</i> -primers and restriction analysis of some amplicons:	42
3.3.4. Amplification using <i>nre1-nre2</i> primer pair:	43
3.3.5. Amplification using <i>nir1-nir2</i> primer pair:	45
3.4. Conclusion:	44
3.5. Summary of Chapter 3:	45
Chapter 4: Taxonomy and growth-physiology of some Gram-negative nickel resistant <i>Torsa</i> isolates possessing inducible nickel resistance mechanism & Application of molecular biology and bioinformatics tools in understanding the nature of nickel resistance genetic system(s) in them.	46
4.1. Biochemical properties of some selected nickel resistant <i>Torsa</i> isolates:	46
4.1.1. Materials and Methods:	46
4.1.1.1. Chemicals and reagents:	46
4.1.1.2. Media and culture condition:	47
4.1.1.3. Biochemical tests:	47
4.1.2. Results and Discussion:	49
4.1.3. Conclusion:	49
4.2. Study of the induction of nickel resistance:	50
4.2.1. Materials and Methods:	51
4.2.1.1. Reagents and Chemicals:	51
4.2.1.2. Pre-incubation of cultures:	51
4.2.1.3. Growth in liquid media:	52
4.2.2. Results and Discussion:	52
4.2.3. Conclusion:	54
4.3. Molecular genetic characterization of nickel resistant determinant(s) of three <i>Torsa</i> isolates that tolerate more than 6 mM nickel chloride:	55

4.3.1.1. Materials and Methods:	56
4.3.1.1.1. Preparation of total genomic DNA:	56
4.3.1.1.2. Restriction Digestion of the genomic DNA:	56
4.3.1.1.3. Southern Hybridization:	56
4.3.1.2. Results and Discussion:	57
4.3.2. Cloning and sequencing of amplicons generated hybridization signal with <i>cnr</i> probe:	59
4.3.2.1. Materials and Methods:	60
4.3.2.1.1. Elution of the PCR products from low melting point agarose:	60
4.3.2.1.2. Cloning of the PCR product:	60
4.3.2.1.3. Sequencing of the inserts of the recombinants:	60
4.3.2.1.4. Analysis of the sequence:	60
4.3.2.2. Results and Discussion:	61
4.4. Conclusion:	64
4.5. Summary of Chapter 4:	68
Chapter 5: Molecular systematic study: the phylogenetic position of three nickel resistant strains of River Torsa:	69
5.1. Phylogenetic analysis using 16S rRNA gene sequences:	69
5.1.1. Material and Methods:	69
5.1.1.1. Isolation of total genomic DNA:	69
5.1.1.2. Amplification, cloning and sequencing of 16S rRNA gene of the strains:	69
5.1.1.3. Phylogenetic analysis of the strains:	69
5.1.2. Results and discussion:	70
5.1.3. Conclusion:	75
5.2. Determination of fatty acid composition, GC content and DNA-DNA relatedness:	77
5.2.1. Analysis of cellular fatty acids (FAME):	77
5.2.1.1. Materials and methods:	77
5.2.1.1.1. Extraction and analysis of fatty acid methyl esters (FAME):	77
5.2.1.1.2. Catalytic reduction of fatty acid methyl esters:	78
5.2.1.1.3. Gas Liquid Chromatography of the fatty acid methyl esters:	78
5.2.1.2. Results and discussion:	78
5.2.2. Analysis of base composition of DNA:	79
5.2.3. Study of DNA-DNA relatedness:	80
5.2.3.1. Material and Methods:	80
5.2.3.1.1. Preparation of the total genomic DNA:	80
5.2.3.1.2. Transfer of DNA to the nylon membrane:	80
5.2.3.1.3. Preparation of probe DNA:	80
5.2.3.1.4. Hybridization and detection of hybridization-intensities:	80
5.2.3.2. Results and discussion:	81
5.3. Conclusion:	81
Description of <i>Serratia ureilytica</i> sp.nov.	83
Description of <i>Enterobacter indica</i> sp.nov.	84
5.4. Summary of chapter 5:	84
General discussion and summary	85
