

CYTOGENETIC STUDY OF THE ETHNIC GROUPS OF MONGOLIAN
ORIGIN INHABITING NORTH BENGAL AND ADJOINING AREAS

Contents	Page
Acknowledgement :	i
Preface :	iii

PART I

Constitutive Heterochromatin Polymorphism

Chapter 1 : Introduction	1
Chapter 2 : Materials and Methods	9
2.1 Materials	9
2.1.1 Geographical description of the area under study	9
2.1.2 The racial groups of Mongolian origin belonging to different ethnic population of North Bengal	9
2.1.3 Basis of classification of different groups	10
2.1.4 Characteristic features of different groups and sub-groups	11
2.1.4.1 Hill Tribes	11
2.1.4.2 Kirati Complex	14
2.1.4.3 Rajbansis	18
2.1.5 Summary of the principal groups and sub-groups	18
2.2 Methods	20
2.2.1 Collection of Blood samples	20
2.2.2 Preparation of Culture Media	21
2.2.3 Collection and Preparation of Human AB Blood Serum	21
2.2.4 Culture setting	22

2.2.4.1	Incubation	22
2.2.4.2	Harvesting	23
2.2.5	Preparation of Slides	23
2.2.5.1	Staining	24
2.2.5.2	Photomicrography	24
2.2.5.3	Karyotype Preparation	24
2.2.6	Chromosome Banding	25
2.2.6.1	C-Banding	26
2.2.6.2	C-Band Scoring	27
2.2.6.3	C-Band Screening	27
Chapter 3	: Observations	29
3.1	Frequency of C-band polymorphism in different Mongolian groups	29
3.2	Frequency of individuals carrying C-band polymorphism	32
3.3	Individual chromosomes exhibiting poly- morphism	32
3.4	Frequency of different level categories	33
3.5	Frequency of C-band inversions	34
3.6	C-band polymorphism-frequency of different level categories	36
3.7	C-band polymorphism - frequency of pairs of different level categories	38
3.7.1	Hill Tribes	39
3.7.2	Kirati Complex	40
3.7.3	Rajban ^g sis	41
3.8	A comparative analysis of the frequency of pairs of different level categories	42
3.9	Frequency of C-band heteromorphism	45

3.10	Frequency of C-band homozygous polymorphism	46
3.11	Frequency of C-band variation of different Mongolian groups	48
3.12	Y chromosome length heteromorphism	50
3.13	Frequency of increased and decreased heterochromatin material	51
3.13.1	Hill Tribes	53
3.13.2	Kirati Complex	54
3.13.3	Rajbansis	55
Chapter 4::	Discussion	56
Chapter 5 :	Summary	67
Chapter 6 :	References	70

PART II

Glucose-6-Phosphate Dehydrogenase Deficiency and Variants

Chapter 1 :	Introduction	87
Chapter 2 :	Materials and Methods	94
2.1	Materials	94
2.2	Methods	95
2.2.1	Collection of Blood Samples	95
2.2.2	Screening methods	95
2.2.2.1	Methaemoglobin reduction test	95
2.2.2.2	Dye test	98
2.2.3	Electrophoretic screening procedure	99
2.2.3.1	Starch gel preparation	99
2.2.3.2	Preparation of haemolysates	100
2.2.3.3	Preparation of staining solution and buffers	101
2.2.3.4	Electrophoretic procedure	103

2.2.4	Enzymologic characterization procedure	104
2.2.4.1	Assay of G6PD activity in haemolysates	104
2.2.4.2	Utilization of substrate analogues	106
2.2.4.3	2.2.4.2.1 2dG6P	106
	2.2.4.2.2 Deamino NADP	107
2.2.4.3	Thermostability test	108
2.2.4.4	pH optima	108
Chapter 3 :	Observations	109
3.1	Incidence of glucose-6-phosphate dehydrogenase deficiency in different Mongolian racial groups	109
3.2	Frequency of glucose-6-phosphate dehydrogenase deficiency in Malaria infected and Malaria free subjects of Mongolian origin	111
3.3	Enzymologic characteristics of glucose-6-phosphate dehydrogenase from normal subjects of Mongolian origin	112
3.3.1	Thermal stability	113
3.3.2	pH optima	114
3.4	Prevalence of electrophoretic variants of glucose-6-phosphate dehydrogenase among nondeficient Mongolian subjects	115
3.4.1	Family study	117
3.5	Enzymologic characteristics of electrophoretically slow moving glucose-6-phosphate dehydrogenase variant	118
3.5.1	Erythrocytic enzyme activity	118
3.5.2	Electrophoretic mobility in different buffers	120
3.5.3	Rate of utilization of substrate analogues	121
3.5.4	Thermal stability	122
3.5.5	pH optima	123

3.6	Enzymologic characteristics of slow moving glucose-6-phosphate dehydrogenase variant and normal B+ type enzymes	125
3.7	Enzymologic characteristics of the class 4 type of glucose-6-phosphate dehydrogenase variants and slow moving glucose-6-phosphate dehydrogenase variant	127
3.8	Comparison of the enzymologic characteristics of slow moving glucose-6-phosphate dehydrogenase variant with other Indian variant enzymes	129
3.9	Enzymologic characteristics of glucose-6-phosphate dehydrogenase from deficient Mongolian subjects	131
3.9.1	Erythrocytic enzyme activity	131
3.9.2	Electrophoretic mobility in different buffers	132
3.9.3	Rate of utilization of substrate analogues	134
3.9.4	Thermal stability	135
3.9.5	pH optima	136
3.10	Enzymologic characteristics of glucose-6-phosphate dehydrogenase from deficient Mongolian subjects and normal B+ type enzymes	138
3.11	Comparison of the enzymologic characteristics of the class 2 type of glucose-6-phosphate dehydrogenase variants and glucose-6-phosphate dehydrogenase from deficient Mongolian subjects	140
Chapter 4	: Discussions	143
Chapter 5	: Summary	151
Chapter 6	: References	154
