Abstract	
1. Introduction	1
1.1 The Equation of Radiation Transfer	2 - 3
1.2 Equation of Transfer in Different Media and Geometries.	3 - 5
1.3 The Wiener - Hopf Technique	5 - 12
1.4 Previous Works	12 - 43
<u>Chapter I</u>	44
I. A. Exact and Unique Solution of a Transport Equation in a Semi - Infinite Medium By Laplace Transform And Wiener - Hopf Technique	45 - 57
<u>Chapter II</u>	58
II. A. Exact Solution of A Radiative Transfer Problem by The Laplace Transform And Wiener - Hopf Technique	59 - 72
II. B. Exact Solution of An Equation of Radiative Transfer with Rayleigh's Phase Function by The Laplace Transform And Wiener - Hopf Technique	73 - 84

II. C. Exact Solution of A Radiative Transfer with A Constant Source and Rayleigh's Phase Function in A Semi - Infinite Atmosphere	85 - 97
II. D. Exact Solution of the Equation of Radiative Transfer with Rayleigh's Phase Function in An Exponential Atmosphere By The Laplace Transform And Wiener - Hopf Techinque	98 - 110
II. E. Exact Solution of the Equation of Radiative Transfer with Rayleigh's Phase Function Together with An Additional Source Function	111 - 124
II. F. Exact Solution of a Transport Equation By the Method of Laplace Transform And Wiener - Hopf Techinque	125 - 140
<b><u>Chapter III</u></b>	<b>141</b>
III. A. Exact Solution of The Equation of Radiative Transfer with Pomraning Phase Function Together with A Constant Source	142 - 158
III. B. Solution of A Radiative Transfer Equation with Pomraning Phase Function And A Linear Source in A Semi - Infinite Medium	159 - 176
III. C. Exact And Unique Solution of A Radiative Transfer Equation with Pomraning Phase Function And An Exponential Source in A Semi - Infinite Medium	177 - 194
III. D. Exact And Unique Solution of A Radiative Transfer Equation with Pomraning Phase Function And A Non - Linear Source in A Semi - Infinite Medium By Laplace Transform And Wiener - Hopf Technique.	195 - 214
<b>Bibliography</b>	<b>215 - 222</b>
