

ACKNOWLEDGEMENTS

The author takes this opportunity to record his grateful thanks to Prof. P. N. Das, M.Sc., D.Phil (Calcutta), M.I.E.E. (Lond.), Department of Physics and Electronics, Jalpaiguri Govt. Engineering College, Jalpaiguri for his guidance in this research work.

The author is indebted to Prof. S. N. Sen, M.Sc., D.Phil, F.Inst.P (Lond.), Dean of Faculty of Science and Head of the Department of Physics - University of North Bengal, Dist. Darjeeling (India) for his constructive criticisms and active interest in the research problem, and also for his kind permission to use the electronics laboratory of North Bengal University.

Thanks are due to Dr. Yasuji Morita, Osaka University, Japan for donating special type of square loop magnetic cores and necessary scientific literatures for carrying out the research problem embodied in the first part of the thesis.

The author is grateful to Dr. B. Subhramanium, Physics Department, Indian Institute of Technology, Madras (India) to Dr. Choudhury, Nuclear Physic Laboratory, University of North Bengal and to Dr. N. C. Sinha, Civil Engineering Department, Jalpaiguri Govt. Engineering College for issuing certain essential scientific equipments used for the experimental work on ultrasonic wave transmission through soil.

Thanks are also due to Mr. R. L. Dewan, Deputy Director, Bihar Institute of Hydraulic and Allied Research Irrigation Department, Govt. of Bihar, Patna (India) for his kind help for carrying out the investigations of Engineering properties of soil and related materials in Bihar (India).

The author expresses his sincere thanks to the Technical Staff of the Physics Department of North Bengal University for their helping attitude while conducting experiments in the laboratory.

He is thankful to the University Grants Commission, Govt. of India, New Delhi (India) for granting him financial assistantship to carry out the study on the ultrasonic wave transmission through soil.
