## PART-I

	<u>Page</u>
<u>CHAPTER-I:</u>	
Morphological features of the fern <u>Polypodium Juglandifolium Don</u> (Syn: <u>Arthropteris Juglandifolia</u> ): ..	1
<u>CHAPTER-II:</u>	
Section A: A short review on the chemical constituents of ferns of <u>Polypodiaceae</u> family: ..	3
<u>CHAPTER-III:</u>	
Investigation on the neutral part of the benzene extract of the fern <u>Polypodium</u> <u>Juglandifolium Don</u> : ..	16
Section A : Extraction: ..	16
Section B: Chromatography of the neutral part: ..	16
Section C :Examination of fractions 1-4: ..	17
<u>CHAPTER-IV:</u>	
Isolation of a new triterpene alcohol, <u>Polypodiol B</u> and investigation on its structure: ..	24
Section A: Nature of the oxygen function: ..	25
Section B: Nature of the Carbon skeleton: ..	29
Section C: Position of the Hydroxyl function: ..	37
Experimental: ..	36

## CHAPTER-V:

Isolation of a new triterpene alcohol Polypodinal C and investigation on its structure: ..	47
Section A: Nature of the oxygen function:	48
Section B: Nature of the carbon skeleton:	49
Section C: Determination of the structure and stereochemistry of Polypodinal C and Polypodinal B: ..	49
Experimental: ..	51

## CHAPTER-VI:

Isolation and identification of cyclolaudanol and cyclolausanol homologues, cyclonealitalol by mass spectrometry; and preparative thin-layer chromatography: ..	58
Experimental: ..	59
References: ..	77

## PART-II

### CHAPTER-I:

Morphological features of the fern <u>Polypodium Ancecum</u> Wall (Polypodiaceae):	61
---	----

### CHAPTER-II:

Investigation on the neutral part of the benzene extract of the fern <u>Polypodium</u> <u>ancecum</u> wall: ..	83
--	----

Section A: Extraction	..	83
Section B: Chromatography of the neutral Part:	..	83
Section C and Section D: Isolation and Identification of $\Delta^9(11)$ Fernene, $\Delta^{22(29)}$ Hopene and $\beta$ -sitosterol:	..	84
Experimental:	..	86
References:	..	92

### PART-III

#### CHAPTER-I:

Section A: Introduction:	..	93
Section B: Reaction of Hg(1c)Acetate with di- and tri-substituted double bonds of steroids:	..	106

#### CHAPTER-II:

Aims and object of the present work:	..	110
--------------------------------------	----	-----

#### CHAPTER-III:

##### Results:

Section A: Hg(1c)Acetate oxidation of $\beta$ -amyrin acetate:	..	114
Section B: Hg(1c)Acetate oxidation of $\alpha$ -amyrin acetate:	..	116
Section C: Hg(1c)Acetate oxidation of Taraxeryl acetate:	..	116

Section D: Structure elucidation of the crystalline solid, m.p. 193°, ( $\alpha$ ) <sub>D</sub> 18.18° ..	117
Section E: Chemical evidence in support of structure <u>24</u> assigned to the Hg(10)Acetate rearrangement products ..	126
Section F: A probable mechanism for the formation of the hydrocarbon <u>24</u> in the reaction of taraxeryl-acetate with Hg(10)Acetate: ..	129
Experimentals ..	131
References: ..	134
