

FOREWORD

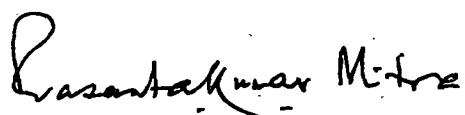

The work embodied in this thesis submitted independently for the degree of Doctor of Philosophy (Science) of the University of North Bengal relates to the studies of antithiamine factor present in *Phaseolus radiatus*.

While presenting the work, I would like to express my deepest gratitude to Dr. T. K. Chatterjee, Registrar, North Bengal University for his continuous inspiration in course of the investigation.

I would also like to express my gratitude to the Head, all teachers, research scholars and staff of the department of Chemistry, North Bengal University for their helpful suggestions and cooperations during the work.

I am thankful to all the teachers and non-teaching staff of the department of Biochemistry, North Bengal Medical College for their sincere help in the work.

Lastly, I am deeply indebted to the management of 'THE BIOCHEM'—a biochemical laboratory at Siliguri for rendering me the facilities of doing some experiments of the present investigation.

(PRASANTA KUMAR MITRA)
