

# Acknowledgement

Words are chameleons, which reflect the color of their environment. Hence for revealing ones emotions and feeling though words may seem to be an exercise in deception there is hardly any proxy to voice the same in such a sublime event as this. Knowing fully well that acknowledgement of any magnitude, however colossal is too small a gesture, I can't help doing that.

At the very outset, I would like to pay my utmost sense of gratitude to my supervisors, Prof U. Chakraborty, Head, Dept. of Botany, North Bengal University and Prof B.N. Chakraborty, Dean, Faculty of Science, North Bengal University for their guidance, undivided attention, kind and valuable suggestions and wise counseling throughout the execution of this endeavor

I would like to offer my sincere thanks to all other teachers and members of the department for their unconditional help and co-operation.

I take this opportunity to express my earnest gratefulness to Global Plant Clinic, Diagnostic and Advisory Service, CABI Bioscience, UK Centre for identifying the bacterial cultures.

Financial assistance received from Dept. of Biotechnology, Govt. of India is gratefully acknowledged

I shall be failing in my duty if I do not acknowledge the enormous support and assistance received from Cyaria, Merab, Belinda, Gargi, Deepti, Rohini, Bhumiika, Arka, Pannalal, Kiran, Utanka, Harikamal and Kanak Baisya, Lecturer, Kurseong College, through out this endeavor. I wish to thank Mr. Babul Biswas for composing the matter of this thesis and field men for maintaining plants in good condition.

Last but not least, mention must be made of my parents, brother Subir, family members, well wishers and of course of my wife Moumita without whose continuous and ungrudging help, relentless encouragement and inspiration this endeavor would not have been successful.
