

A C K N O W L E D G E M E N T S

The present thesis embodies the results of research work carried out by the author at the Department of Chemistry, University of North Bengal.

The author, at the very first opportunity, pays his heart-felt homage and tribute to the departed soul of Late Professor H.N.Khastgir, formerly Professor of Chemistry at the University of North Bengal who was supervising the work with valuable suggestions and affectionate guidance.

The author will remain ever indebted to Dr. B.P.Pradhan, M.Sc., Ph.D., Lecturer in Chemistry, University of North Bengal who, after the sudden demise of Prof. H.N.Khastgir and at the earnest request of the author, came forward to look after the work of the candidate with constant encouragement, close attention, helpful discussions, valuable guidance and criticism on the work.

The author's thanks are due to Dr. Nityanand of Central Drug Research Institute, Lucknow, to Prof. T.R.Govindachari of Ciba Research Centre, Goregaon, Bombay, to the Head of Regional sophisticated Instrumentation Centre, Madras for the N.M.R. spectra recorded in the thesis. The author is particularly indebted

(II)

to Dr. J.N. Shoolery of N.M.R. application laboratory, Varian Instrumentation Division, California for kindly recording some NMR spectra with his valuable comments.

The author is grateful to Dr. B.C. Das, Institute de Chimie des Substances Naturelles, Gif-sur-Yvette, France for the mass spectra recorded in the thesis. The author is thankful to Dr. P.K. Bose, Bose Institute for an authentic sample of Aegiceradiol.

The author is thankful to Dr. S.R. Sengupta, East India Pharmaceutical Works Ltd., Calcutta for the optical rotation studies. The author is grateful to Mr. S. Datta, Electro Instrumentation Officer at the Department of Chemistry, University of North Bengal for the I.R. spectra recorded in the thesis and also for the intimate information regarding the U.G.C. Teacher-Fellowship Scheme.

The author expresses his grateful thanks to the authorities of Alfred Bernhardt Mikroanalytisches Laboratorium, West Germany, for the microanalysis recorded in the thesis. He is also thankful to Mr. R.C. Sarkar of United Chemicals and Allied Products, Calcutta for kindly supplying the plant materials.

The author is thankful to the University Grants Commission, New Delhi, for awarding a Teacher-Fellowship, to the Governing Body of Alipurdwar College for sanctioning the academic leave for

(III)

three years and also to the authorities of North Bengal University for extending laboratory and library facilities.

The author expresses his warmest thanks to Dr. B.Saha, Dr. A.Dasgupta, Mr. A.Goswami, Mr. A.Nath, Mr. S.De, Mr. D. Chakravarti, Mr. A.Masumdar for their kind co-operation and encouragement during the progress of the work. Special thanks are due to Mr. S.Dutta of Finance Branch, North Bengal University for his constant inspiration during the last few years. Thanks are also due to Dr. S.N.Bose, Lecturer in Chemistry and to Dr. T.K.Ray, Research Assistant at the Department for helpful discussions.

The author is indebted to Mrs. S.Khastgir, wife of late Prof. H.N.Khastgir, to Dr. S.K.Chakravarti, Professor & Head of the Department of Chemistry, North Bengal University and also to Dr. A.K.Ghosh, Professor of Chemistry at the University of North Bengal for their constant inspiration and encouragement.

The author feels heart-felt feelings for the constant inspiration and encouragement provided by his wife Mrs. P.Mukherjee and his younger brother Dr. M.Mukhopadhyay, M.B.B.S. (Hons). He is also thankful to his sisters and other relatives for their inspiration. The author expresses his deep regards to his parents for their inspiration and encouragement.
