

### ACKNOWLEDGEMENTS

I take this opportunity to express my sincere gratitude to Dr. Dhruva Dasgupta, Reader, Department of Physics, University of North Bengal for his inspiring guidance, critical evaluation and continuous encouragement, which have greatly contributed towards the completion of this work.

I wish to convey my sincere thanks to the University Grants Commission, New Delhi for providing me with a research fellowship and the authorities of the University of North Bengal for providing me with laboratory and library facilities.

This work has benefited immensely from the unstinted cooperation of all members of the Physics Department of North Bengal University. The technical help of Mr. S.Sarkar and Mr. P.Tamang is gratefully acknowledged. I wish to thank Dr. B.Basu, Department of Chemistry, University of North Bengal for intensive discussions relating to various aspects of my work. I am indebted to Dr. A.Majumder of the Chemistry Department, University of North Bengal for helping me in the optical absorption measurement, Dr. P.S.Roy, Mr. M.C.Saha and Mr. S.Panchanan of the Chemistry Department, University of North Bengal, for their help with some chemical analysis and Regional Sophisticated Instrumentation Centre, Calcutta for SEM measurements.

I thank the technical staff of the University Service and Instrumentation Centre, North Bengal University, for helping me in different areas of my work.

In the preparation of this manuscript, I am grateful to my friend Mr. D.P.Boot for drafting the figures, Mr. Chanchal Kumar Pal for his meticulous typing and Mrs. Manjari Karanjai in compilation of this Thesis.

Finally, I express my gratefulness to my parents and brothers, who are the sources and strength of my inspiration, and in particular, to my wife, to whom I owe the impetus and encouragement to complete this thesis.

Dated : November 30th, 1989
