Introduction	1

CHAPTER I

SOME ELASTODYNAMIC PROBLEMS ON CRACK PROPAGATION

Paper 1: Two coplanar Griffith cracks moving in a strip under anti-plane shear stress.	28
Paper 2: Two coplanar Griffith cracks moving along the interface of two dissimilar elastic media.	46
paper 3: Problem of two coplanar Griffith cracks running steadily under three dimensional loading.	66
Paper 4: Three coplanar moving Griffith cracks in an infinite elastic medium.	99
Paper 5: Three coplanar moving Griffith cracks in an infinite elastic strip.	122
Paper 6: Four coplanar Griffith cracks in an infinite elastic medium.	142

CHAPTER II

EXTENDING CRACK PROBLEMS IN ELASTODYNAMICS

Paper 7: Non-symmetric extension of a plane crack due to plane SH-waves in a pre-stressed infinite elastic medium.	174
Paper 8: Extension of a crack due to plane SH-wave in a pre-stressed infinite elastic medium.	196

Paper 9: Bifurcation of a crack due to plane SH- waves in a pre-stressed infinite elastic medium.	224
---	-----

CHAPTER III

PROBLEMS ON PROPAGATION OF ELASTIC WAVES IN THE PRESENCE OF TOPOGRAPHICAL IRREGULARITY

Paper 10: Time step SH- wave transmission across a rectangular step.	239
Paper 11: SH- wave propagation across a vertical step in two joined elastic half- spaces	252
Bibliography.	267
