

# Contents

<b>1</b>	<b>Introduction</b> . . . . .	<b>1</b>
	1.1 Observation and Motivation of the works . . . . .	2
	1.2 Problem Statement . . . . .	4
	1.3 Contributions of the Dissertation . . . . .	7
	1.4 Organization of the Thesis . . . . .	9
	1.5 Summary . . . . .	10
<b>2</b>	<b>Background and Related Work</b> . . . . .	<b>11</b>
	2.1 Text classification and Sentiment analysis . . . . .	11
	2.2 Related Datasets . . . . .	12
	2.3 Methods in the Literature . . . . .	21
	2.3.1 COVID-19 Article Classification . . . . .	21
	2.3.2 COVID-19 Rumor Classification . . . . .	26
	2.3.3 Sentiment analysis during COVID-19 . . . . .	30
	2.4 Summary . . . . .	37
<b>3</b>	<b>COVID-19 Article Classification</b> . . . . .	<b>38</b>
	3.1 Background . . . . .	38
	3.2 Article Classification . . . . .	38
	3.3 Attention-based Bidirectional LSTM . . . . .	43
	3.3.1 Long short-term memory (LSTM) . . . . .	44
	3.3.2 Word embedding . . . . .	46
	3.3.3 BiLSTM with attention mechanism (A-BiLSTM / ABiLSTM) . . . . .	47
	3.4 Experiments . . . . .	50
	3.4.1 LitCovid Dataset . . . . .	50
	3.4.2 Argument settings . . . . .	51

		X
	3.4.3 Feature vector . . . . .	51
	3.5 Results and Discussions . . . . .	54
	3.6 Summary . . . . .	57
<b>4</b>	<b>COVID-19 Rumor Classification . . . . .</b>	<b>58</b>
	4.1 Background . . . . .	58
	4.2 Rumor Classification . . . . .	59
	4.3 BERT Language Model . . . . .	59
	4.4 BERT-ABiLSTM Language Model . . . . .	62
	4.5 Experiments . . . . .	63
	4.5.1 Dataset . . . . .	64
	4.5.2 Data preprocessing . . . . .	65
	4.5.3 Over-sampling for imbalanced dataset . . . . .	65
	4.6 Results and Discussions . . . . .	67
	4.7 Summary . . . . .	71
<b>5</b>	<b>Aspect Based Sentiment Analysis during COVID-19 pandemic in India . . . . .</b>	<b>72</b>
	5.1 Background . . . . .	72
	5.2 Sentiment Analysis . . . . .	73
	5.3 Aspect Term Extraction and Sentiment Aggregation . . . . .	74
	5.3.1 Dataset . . . . .	74
	5.3.2 Pre-processing . . . . .	75
	5.3.3 Clustering . . . . .	75
	5.3.4 Aspect term Identification . . . . .	77
	5.3.5 Sentiment measure . . . . .	83
	5.3.6 Result and Discussion on Aspect Term Extraction and Senti- ment Aggregation . . . . .	86
	5.4 Proposed Deep Learning Model for Aspect Based Sentiment Classification . . . . .	88
	5.4.1 Long short-term memory . . . . .	90
	5.4.2 Gated recurrent unit . . . . .	90
	5.4.3 Experimental setup . . . . .	92

	XI
5.4.4	Result and Discussion on Aspect Based Sentiment Classification 93
5.5	Summary . . . . . 97
<b>6</b>	<b>An Aspect-Based Sentiment Analysis on Online Teaching-Learning Tweets during COVID-19 using Deep Learning . . . . . 98</b>
6.1	Background . . . . . 98
6.2	Sentiment Analysis . . . . . 99
6.3	Methodology for Aspect aggregation and extraction/identification 99
6.3.1	Dataset . . . . . 100
6.3.2	Pre-processing . . . . . 100
6.3.3	K-Medoid Clustering . . . . . 101
6.3.4	Aspect term identification . . . . . 103
6.3.5	Multi-Criteria Decision Making (MCDM) . . . . . 106
6.3.6	Result and Discussion on Aspect aggregation and identification 108
6.4	Proposed Deep Learning model for Sentiment Classification . . 110
6.4.1	Experimental setup . . . . . 116
6.4.2	Result and Discussion . . . . . 116
6.5	Summary . . . . . 119
<b>7</b>	<b>Conclusion . . . . . 120</b>
7.1	Summary and Findings of this Thesis . . . . . 120
	<b>Appendix A1: List of Research Publications . . . . . 140</b>
