

## List of Figures

| Figure  | Page |
|---|------|
| 2.1 Illustrating the variation of $q$ vs $D$ . . . . .  | 23   |
| 2.2 Illustrating the variation of $H$ vs $t$ for different value of $D$ . . . . .   | 23   |
| 2.3 Illustrating the variation of $q$ vs $H$ for a given value of $\alpha$ , $\mu$ , $q$ and $q'$ . . .                       | 25   |
| 2.4 Illustrating the variation of $q$ vs $H$ for different initial conditions $q'$ . . . .                                    | 26   |
| 2.5 Illustrating the variation of $q$ vs $H$ for different value of $\alpha$ . . . . .  | 27   |
| 2.6 Illustrating the variation of $q$ vs $H$ for different value of $\mu$ . . . . .   | 28   |
| 2.7 Illustrating the variation of $q$ vs $H$ for $f(R) = R - \frac{\mu^4}{R}$ for different value of $\mu^4$ . . . . .        | 29   |
| 2.8 Illustrating the variation of $q$ vs $H$ for $f(R) = R + b \ln R$ for different value of $b$ . . . . .                    | 30   |
| 2.9 Illustrating the variation of $q$ vs $H$ for different value of $n$ . . . . .   | 31   |
| 2.10 Illustrating the variation of $q$ vs $H$ for different value of $m$ . . . . .  | 31   |
| 2.11 Illustrating the variation of $q$ vs $H$ for comparison between analytic polynomial function and numerical plot. . . . . | 32   |
| 3.1 Illustrating the variation of $q$ vs $H$ for different initial conditions of $q''(1)$ . .                                 | 43   |
| 3.2 Illustrating the variation of $q$ vs $H$ for different value of $\gamma$ . . . . .  | 44   |
| 3.3 Illustrating the variation of $q$ vs $H$ for different value of $\alpha$ . . . . .  | 44   |
| 3.4 Illustrating the variation of $q$ vs $H$ for different value of $\beta$ . . . . .   | 45   |

|      |  |    |
|------|--|----|
| 3.5  | Illustrating the variation of $q$ vs $H$ for different value of $n$ . . . . .  | 45 |
| 3.6  | Illustrating the variation of $q$ vs $H$ for different values of $m$ . . . . .   | 46 |
| 3.7  | Illustrating the variation of $q$ vs $H$ in the absence of cosmological constant.  | 46 |
| 3.8  | Shows the plot of comparison between the polynomial expression and the curve from numerical analysis. . . . .  | 47 |
| 3.9  | Illustrating the variation of $q$ vs $H$ for a different values of $n$ . . . . .   | 50 |
| 3.10 | Illustrating the variation of $q$ vs $H$ for a different values of $\beta$ . . . . .   | 50 |
| 3.11 | Illustrating the variation of $q$ vs $H$ for a different values of $\gamma$ . . . . .  | 51 |
| 4.1  | Illustrating the variation of $\frac{T}{T_0}$ vs $t$ for a different value of $\gamma$ with $D = \frac{3}{2}$ . . . . .  | 61 |
| 4.2  | Illustrating the variation of $\frac{T}{T_0}$ vs $t$ for a different value of $m$ with $D = \frac{3}{2}$ and $\gamma = \frac{4}{3}$ . . . . .                                  | 62 |
| 4.3  | Illustrating the variation of $\mu$ vs $z$ for supernova data (dashing line) and for the exponential expansion (solid line) with $\eta = 0.00038$ . . . . .                    | 65 |
| 4.4  | Illustrating the variation of $\mu$ vs $z$ for supernova data (dashing line) and for the power law expansion (solid line) with $H_0 = 10^{-5}$ and $D = \frac{4}{3}$ . . . . . | 65 |
