

Contents

Chapter 1

Introduction.

1.0	The equation of radiative transfer.	1
1.1	The spherical harmonic method.	2
1.2	A particular problem.	9
1.3	Necessity of modification.	16
1.4	Modifications of spherical harmonic method	20
1.5	Application of spherical harmonic method to Radiative Transfer Problems.	23
1.6	Application of spherical harmonic method to Heat Transfer Problems.	40
1.7	Application of spherical harmonic method to Neutron Transfer and Other Problems.	52

Chapter 2

Radiative transfer problem in semi-infinite atmospheres.

2.1	Solution of a radiative transfer problem in semi-infinite atmosphere with isotropic scattering using a modified form of spherical harmonic method.	65
2.2	Solution of a radiative transfer problem in semi-infinite atmosphere with Rayleigh phase function using a modified form of spherical harmonic method.	79
2.3	Solution of a radiative transfer problem in semi-infinite atmosphere with General phase function using a modified form of spherical harmonic method.	98

Chapter 3.

Radiative transfer problem in finite atmospheres.

- | | |
|---|-----|
| 3.1 Solution of a radiative transfer problem in finite atmosphere with isotropic scattering using a modified form of spherical harmonic method. | 112 |
| 3.2 Solution of a radiative transfer problem in finite atmosphere with Rayleigh phase function using a modified form of spherical harmonic method. | 127 |
| 3.3 Solution of a radiative transfer problem in finite atmosphere with Planetary phase function using a modified form of spherical harmonic method. | 142 |
| 3.4 Solution of a radiative transfer problem in finite atmosphere with Henyey-Greenstein phase function using a modified form of spherical harmonic method. | 153 |
| 3.5 Solution of a radiative transfer problem in finite atmosphere with General phase function using a modified form of spherical harmonic method. | 165 |

Chapter 4.

Radiative transfer problem in spherical atmospheres

- | | |
|---|-----|
| 4. Solution of a radiative transfer problem in a spherical atmosphere with Isotropic scattering using a modified form of spherical harmonic method. | 177 |
|---|-----|

Chapter 5.

H - function

- | | |
|--|-----|
| 5. Study of some approximate forms of H -function. | 192 |
|--|-----|

Bibliography.
