

UNIVERSITY OF NORTH BENGAL

DEPARTMENT OF BOTANY

NORTH BENGAL UNIVERSITY 734430
WEST BENGAL, INDIA

Dated 11.11. 1991

This is to certify that Sri Harsha Behadur Chhetri, M.Sc. has worked under my supervision since February 1985 for his dissertation on the topic 'An Ecological study of the vegetation of Teesta Sub-Catchment area (South Sikkim) with special emphasis on the Utilization of the Local Species for Eco-Restoration and Eco-Development of the region' for fulfilment of the requirements of the Degree of Doctor of Philosophy (Science) of the University of North Bengal.

He has carried out the work thoroughly and is quite conversant with the techniques and literatures cited in the dissertation. The thesis seems to be fit for the submission for Ph.D., and he appears worthy for the award of the degree.

(S. K. BASU)

Professor & Director,
Centre for Life Sciences
University of North Bengal.
