

## ACKNOWLEDGEMENTS

I wish to express my warmest and deepest sense of gratitude to Prof. G. S. S. Murthi, Department of Chemistry, University of North Bengal, Darjeeling, for suggesting the problem, constant guidance and regular encouragement throughout the course of investigation.

I am thankful to University Grants Commission, New Delhi for the financial support by way of awarding a fellowship from October, 1982 to October 1986.

Cooperation rendered by Dr. Basudeb Basu, Dr. R. N. Mukherjee, Dr. (Mrs) M. Murthi, Madhusudan Basak, Dr. Sutapa Misra, Chemistry Department, North Bengal University, Darjeeling and Dr. R. P. Pathak, CSMRS, New Delhi, through various ways is greatly acknowledged.

Sincere thanks are due to Dr. S. K. Saha and Dr. Alok Majumder, North Bengal University, Darjeeling, for recording the IR spectra and in interpretation of spectral data.

I am much grateful to <sup>the</sup> Director, Central Drug Research Institute, Lucknow and Dr. Rajiv Sharma, Delhi University for Mass and NMR determination.

I am obliged to Director, Central Soil and Materials Research Station, New Delhi, for granting leave for completion of thesis.

My hearty thanks to Mr. Murari Ratnam, SRO and all lab colleagues of Chemistry Division, CSMRS, New Delhi for encouragement and cooperation during the completion of thesis.

Finally I extend my deepest sense of indebtedness to my

parents, with whose inspiration, loving support and regular encouragements, this work has been possible in the present state.

Nov. 1992

(PURABI SARKAR)

Unfortunately a number of trivial mistakes had crept into the thesis. These have now been corrected as suggested by the examiners. The mass fragmentation schemes have also been deleted as suggested by them. In Part-II of the thesis, the structure of the keto alcohol has been revised on the basis of Inadequate 2D NMR studies. A note has been added as an addendum to the thesis.
