

ACKNOWLEDGEMENT

The present thesis embodies the results of Research works carried out by the author in the Department of Chemistry, University of North Bengal, (Dist.) Darjeeling, West Bengal, India.

The author is deeply indebted and grateful to Dr. A.K.Ghosh, M.Sc., D.Phil, Reader in Chemistry, University of North Bengal, for his keen interest and active guidance throughout the work.

The author is very grateful to Mr B.Majee, M.Sc., Lecturer in Chemistry, University of North Bengal, for his creative criticism and valuable suggestions on some of the problems during the investigations.

The author gratefully acknowledges the gift of tricyclohexyltin bromide by Prof. A.G.MacDiarmid, University of Pennsylvania, Philadelphia, Pa, U.S.A.

The author extends his warmest thanks to Mr Nirmal Bhattacharya, M.A., Research Scholar, Department of Geography & Applied Geography, University of North Bengal, for his helpful cooperation in tracing the spectra from the original, presented in this thesis.

The author wishes to record appreciation for the generous help and continuous inspiration given by some of his relatives and friends, Mr. R.Gupta and Mr. G.Mandy in particular, throughout this period.

Thanks are due to the Librarian and the members of his staff, University of North Bengal, for their immense help.

The author offers his sincere thanks to Dr. A. Bernhardt, Mulheim, West Germany, for micro analysis.

In conclusion, the author expresses his thanks to the authorities of the University of North Bengal, for the award of a University Research Scholarship and extending full Laboratory and other facilities.

Department of Chemistry,
University of North Bengal,
Dist. Darjeeling, India.
June, 1974.
