<b>1. Introduction</b>	<b>1</b>
<b>2. Review of literature</b>	<b>7</b>
2.1. Spices	7
2.2. Foodborne pathogenic bacteria	12
2.2.1. <i>Bacillus cereus</i>	12
2.2.2. <i>Clostridium perfringens</i>	14
2.2.3. <i>Staphylococcus aureus</i>	17
2.2.4. Enterobacteriaceae	18
2.2.4.1. <i>Escherichia coli</i>	19
2.2.4.2. <i>Salmonella</i>	20
2.2.4.3. <i>Shigella</i>	21

- 3.2.4.3.4. Enterobacteriaceae 40
  - 3.2.4.3.4.1. Glucose fermentation 40
  - 3.2.4.3.4.2. Oxidase 41
  - 3.2.4.3.4.3. Lactose fermentation in presence of bile 41
  - 3.2.4.3.4.4. Indole production 41
- 3.2.4.3.5. *Salmonella* and *Shigella* 41
  - 3.2.4.3.5.1. Sugar fermentation and hydrogen sulphide production 41
  - 3.2.4.3.5.2. Decarboxylation/deamination of lysine and hydrogen sulphide production 42
  - 3.2.4.3.5.3. Motility and nitrate reduction 42
  - 3.2.4.3.5.4. Indole production 42
  - 3.2.4.3.5.5. Methyl red and Voges-Proskauer reaction 42
- 3.2.5. Susceptibility to antimicrobials 42
- 3.2.6. Thermal inactivation of sporeformers 42
  - 3.2.6.1. *Bacillus cereus* 42
    - 3.2.6.1.1. Preparation of spore suspension 43
    - 3.2.6.1.2. Determination of D and z-values 43
  - 3.2.6.2. *Clostridium perfringens* 43
    - 3.2.6.2.1. Selection of medium for maximum sporulation 43
    - 3.2.6.2.2. Preparation of spore suspension 44
    - 3.2.6.2.3. Determination of D-value 44
- 3.2.7. Enterotoxins 44
  - 3.2.7.1. Extraction 44
    - 3.2.7.1.1. *Bacillus cereus* enterotoxin 44
    - 3.2.7.1.2. *Clostridium perfringens* enterotoxin 44
  - 3.2.7.2. Assay 45
- 3.2.8. Microbial challenge testing in black pepper powder 45
- 3.2.9. Safety of foods on storage 45
  - 3.2.9.1. Seasoning/intentional inoculation of *aloo dam* (a potato-based food) with a spice and *Bacillus cereus* separately 45
    - 3.2.9.1.1. Preparation of *aloo dam* 45
    - 3.2.9.1.2. Challenge study on *aloo dam* 46
  - 3.2.9.2. Intentional inoculation of meat (goat) curry with *Clostridium perfringens* 46
    - 3.2.9.2.1. Preparation of meat curry 46
    - 3.2.9.2.2. Challenge study on gravy 47
- 3.2.10. Effect of garlic on growth and BCET production 47

3.2.10.1. Inhibitory activity of garlic slices	47
3.2.10.2. Preparation of garlic extract	47
3.2.10.3. Assay of antibacterial activity	48
3.2.10.4. Estimation of BCET	48
3.2.11. Effect of pH on growth	48
3.2.12. Growth as influenced by food preservatives	48
3.2.12.1. Determination of minimum inhibitory concentrations	48
3.2.12.1.1. Sodium chloride	48
3.2.12.1.2. Benzoic acid	49
3.2.12.1.3. Sorbic acid	49
3.2.12.1.4. Nisin	49
3.2.12.2. Combined effect of pH, sodium chloride, benzoic acid and nisin on growth of <i>Bacillus cereus</i>	49
3.2.13. Statistical analysis	50
<b>4. Results</b>	<b>51</b>
4.1. Sampling	51
4.2. Isolation and confirmation of bacterial pathogens	57
4.3. Moisture profile and bacteriological quality of spices	68
4.4. Susceptibility to antimicrobials	74
4.5. Thermal inactivation of sporeformers	74
4.6. Enterotoxin	77
4.7. Microbial challenge testing in a spice	79
4.8. Safety of seasoned and intentionally inoculated foods on storage	80
4.9. Effect of garlic on growth and toxin production	81
4.10. Effect of pH on growth	84
4.11. Effect of food preservatives on growth	84
<b>5. Discussion</b>	<b>88</b>
5.1. Occurrence of foodborne bacterial pathogens in Indian retail spices	88
5.2. Behaviour of the spice isolates	91
5.2.1. Susceptibility to antimicrobials	91
5.2.2. Thermal inactivation of sporeformers	92
5.2.3. Growth and production of enterotoxins	93
5.2.4. The influence of hurdles on growth	95
<b>6. Summary</b>	<b>100</b>
<b>7. Bibliography</b>	<b>103</b>
<b>Subject index</b>	<b>116</b>
