ACKNOWLEDGEMENTS	(i)
1. INTRODUCTION	1
1.1. Importance of rhesus in scientific research	4
1.2. Systematic position	5
1.3. Close relatives	6
1.4. Phylogenetic consideration	6
1.5. Present distribution	7
1.6. Objectives of the present study	7
Tables	9
2. LITERATURE REVIEW	12
3. STUDY AREA	17
3.1. Geographical location	17
3.2. Area and population	17
3.3. Meteorology	18
3.4. Rivers	19
3.5. Soil	19
3.6. Vegetation	20
3.7. Mango cultivation	20
3.8. Monkey infested blocks	20
3.9. Specific study spots	21
Tables	23
4. GENERAL METHODS FOR OBSERVATION	25
4.1. Introduction	25
4.2. Study area	26
4.3. Study period	27
4.4. Daily observation schedule	27
4.5. Mode of observation	27

	Pages
4.6. Equipment used	28
4.7. Methods of recording behaviour	29
5. HABITAT	30
5.1. Introduction	30
5.2. Methods	30
5.3. Results and Discussions	31
5.3.1. Habitat types in the present study area	31
5.3.2. Habitat : Food Resource	33
5.3.3. Habitat : Season	33
Tables	35
6. PHYSICAL FEATURES	37
6.1. Introduction	37
6.2. Methods	37
6.3. Results and discussions	37
6.3.1. Age	37
6.3.2. Morphological Features	38
6.3.2.1. Adult	38
6.3.2.2. Juveniles	38
6.3.2.3. Infant	39
6.3.3. Sex	39
Tables	40
7. POPULATION STUDIES	41
7.1. Introduction	41
7.2. Methods	41
7.3. Results and Discussions	43
7.3.1. Population estimate	43
7.3.2. Population dynamics	45
7.3.2.1. Home Ranges	45
7.3.2.2. Birth Season	47

	Pages
7.3.2.3. Sex ratio	48
7.3.2.4. Population composition	49
7.3.2.5. Natality	50
7.3.2.6. Mortality	51
7.3.2.7. Population increase	52
7.3.2.8. Population density	53
Tables	54
8. FEEDING BEHAVIOUR	62
8.1. Introduction	62
8.2. Methods	62
8.2.1. Identification of food species	63
8.2.2. Plant parts estimation	63
8.2.3. Food selection ratio	64
8.2.4. Total food intake	65
8.3. Results and Analysis	65
8.3.1. Feeding mode of Rhesus	65
8.3.2. Food species analysis	66
8.3.3. Food selection	67
8.3.4. Diet and seasonal variation	67
8.3.5. Total food intake	68
8.3.6. Drinks	69
Tables	70
9. GENERALACTIVITY PATTERN	76
9.1. Introduction	76
9.2. Methods	77
9.3. Results and discussions	78
9.3.1. Diurnal activities	78
9.3.2. Resting sites	80

	Pages
9.3.3. Utilization of different areas of tree	81
Tables	83
10. SOCIAL ORGANIZATION	85
10.1. Introduction	85
10.2. Methods	85
10.3. Results and discussions	86
10.3.1. Group types	86
10.3.2. Group size	87
10.3.3. Group composition	89
10.3.4. Sub grouping activity	89
10.3.5. Interaction with other species	91
Tables	92
11. MANGO PRODUCTION AND EMPLOYMENT OF PEOPLE IN THIS TRADE	95
11.1. Introduction	95
11.2. Methods	96
11.3. Results and Analysis	96
11.3.1. Climate and soil factors in mango cultivation	96
11.3.2. Cultivated land and nature of production	98
11.3.3. Variety of mangoes	98
11.3.4. Nature and number of mango orchard	99
11.3.5. Involvement of people in mango trade	99
11.3.5.1. Selling and buying process of orchards	99
11.3.5.2. Security men in the orchards	99
11.3.5.3. Plucking of fruits	100
11.3.5.4. Packing and transport	100
11.3.5.5. Mango storage centres	100
11.3.5.6. Basket making	101

	Pages
11.3.5.7. Mango product industries	101
11.3.5.8. Research activities and grafting	102
11.3.6. Events promoting mango cultivation and production	102
11.3.7. Mango as medicine	103
11.3.8. Problems and remedies associated with mango cultivation and trade	104
11.3.8.1. Major problems faced by mango growers	104
11.3.8.2. Remedial measures	104
11.3.8.3. Problems of insects and monkeys	105
Tables	106
12. INTERACTIONS BETWEEN RHESUS AND HUMANS IN MALDA DISTRICT	111
12.1. Introduction	111
12.2. Methods	112
12.3. Results and discussions	112
12.3.1. Incidence of monkey population in different blocks	113
12.3.2. Crop raiding by monkeys	113
12.3.3. Damage induced by monkeys in mango production	114
12.3.4. Subsistence of monkeys in the non-mango season	115
12.3.5. Direct competition and overt attacks on humans by monkeys	115
12.3.6. Assault on humans by the rhesus under various situations	116
12.3.7. Diseases transmitted by rhesus on humans	117
12.3.8. Commensal and altruistic association between rhesus and man	118
