Chapter 1. Introduction	1
1.1 Medicinal plants – growing importance in the global market	3
1.2 Changing market trend of medicinal plants in India	3
1.3 Medicinal plants - in context to Indian Himalayan Region	5
1.4 Medicinal plants and current problems	6
1.5 Medicinal plants – a concern in Sikkim	7
1.6 Importance of the current research and the focal species	9
1.6.1 The genus ' <i>Swertia</i> '	10
1.6.2 The species distribution	12
1.6.3 Plant morphology	12
1.6.4 Chemical constituents in <i>Swertia chirayita</i>	13
1.6.5 Use of <i>Swertia chirayita</i> in Ayurveda	14
1.6.6 Medicinal importance of <i>Swertia chirayita</i>	15
1.6.7 Pharmacological properties of <i>Swertia chirayita</i>	16
1.6.8 Herbal and Ayurvedic preparations from <i>Swertia chirayita</i>	17
1.6.9 Economic importance of <i>Swertia chirayita</i>	17
1.7 Rationale of the study	19
1.8 Objectives of the study	20
Chapter 2. The study area	21
2.1 Physiography	21
2.2 Geology	22
2.3 Climate	23
2.4 Flora	24
2.5 Fauna	25
2.6 Protected Area Network	26
2.7 Social profile	26
2.8 Economic profile	27
Chapter 3. Review of literature	29
3.1 Introduction	29
3.2 Population assessment and habitat characteristics of medicinal plants	30
3.3 Morphological variations amongst populations	34
3.4 Propagation of medicinal plants under laboratory condition	37
3.4.1 Effect of microhabitat, light and temperature on seed germination	37
3.4.2 Effect of storage period, storage condition and storage temperature on seed germination	38
3.4.3 Chemical stimulation of seed germination	40
3.5 Propagation of medicinal plants under nursery condition	43
3.5.1 Influence of chemical treatments on seedling emergence and vigour	43
3.6 Growth and plant phenology	45
3.7 Development of agro-techniques, harvesting techniques and economic viability of cultivation of medicinal plants	46

Chapter 4. Population Studies and Habitat Assessment	51
4.1 Introduction	51
4.2 Materials and Methods	53
4.2.1 Study area	53
4.2.2 Data collection	54
4.2.3 Statistical analysis	55
4.3 Results	56
4.4 Discussion	61
4.5 Conclusion	69
Chapter 5. Morphological Variability amongst Populations	86
5.1 Introduction	86
5.2 Materials and Methods	88
5.2.1 Material	88
5.2.2 Morphological characters	88
5.2.3 Statistical analysis	88
5.3 Results	89
5.4 Discussion	92
5.5 Conclusion	95
Chapter 6. Effect of Microhabitat, Light and Temperature on Seed Germination	110
6.1 Introduction	110
6.2 Material and Methods	112
6.2.1 Seed germination test	112
6.2.2 Statistical analysis	113
6.3 Results	113
6.4 Discussion	115
6.5 Conclusion	118
Chapter 7. Effect of Storage Period on Seed Germination	122
7.1 Introduction	122
7.2 Materials and Methods	123
7.2.1 Seed collection	123
7.2.2 Seed morphology	123
7.2.3 Seed germination	123
7.2.4 Statistical analysis	124
7.3 Results	124
7.4 Discussion	125
7.5 Conclusion	127
Chapter 8. Assessment of Seedling Emergence and Vigour for Quality Planting Material	131
8.1 Introduction	131
8.2 Materials and Methods	133
8.2.1 Experimental design	133
8.2.2 Seedling survival	134
8.2.3 Statistical analysis	135
8.3 Results	135
8.3.1 Effect of substrate combinations on seedling onset, T50 and final emergence	135
8.3.2 Effect of different substrate combination on	136

	seedling emergence, mean emergence time and emergence rate	
8.3.3	Effect of different substrate combinations on seedling growth, biomass and vigour	136
8.3.4	Effect of different substrate combinations on seedling survival	137
8.4	Discussion	137
8.5	Conclusion	139
Chapter 9.	Effect of Storage Conditions and Storage Periods on Seed Germination	148
9.1	Introduction	148
9.2	Materials and Methods	151
9.2.1	Experimental design	151
9.2.2	Statistical analysis	152
9.3	Results	153
9.4	Discussion	154
9.5	Conclusion	157
Chapter 10.	Phenology, Growth and Development	163
10.1	Introduction	163
10.2	Materials and Methods	165
10.2.1	Study site	165
10.2.2	Experimental design	165
10.2.3.	Statistical analysis	166
10.3	Results	166
10.3.1	Survivability in different growing conditions	166
10.3.2	Phenological events in different growing conditions	167
10.3.3	Effect of growing conditions on growth and development	169
10.4	Discussion	170
10.5	Findings	174
Chapter 11.	Chemical Stimulation of Seed Germination	185
11.1	Introduction	185
11.2	Materials and Methods	187
11.2.1	Propagule collection	187
11.2.2	Seed germination test	187
11.2.3	Statistical analysis	188
11.3	Results	188
11.4	Discussion	189
11.5	Conclusion	192
Chapter 12.	Chemical Treatment and Its Impact on Seedling Emergence and Vigour	197
12.1	Introduction	197
12.2	Materials and Methods	199
12.2.1	Seed collection	199
12.2.2	Experimental design	199
12.2.3	Statistical analysis	200
12.3	Results	201

12.3.1	Seedling emergence	201
12.3.2	Seedling growth and biomass	202
12.4	Discussion	202
12.5	Conclusion	205
Chapter 13.	<i>Ex-situ</i> Cultivation Trials and Sustainable Harvesting Techniques	213
13.1	Introduction	213
13.2	Materials and Methods	215
13.3	Results	217
13.3.1	Seedling survival and plant growth under three growing conditions	217
13.3.2	Account of yield (seed and biomass) under three growing conditions	218
13.3.3	Commercial viability of cultivation under three growing conditions	219
13.4	Discussion	219
13.5	Recommended cultivation techniques	222
13.6	Sustainable harvesting, drying and storage techniques	223
13.7	Conclusion	225
Chapter 14.	Conservation Plan for <i>Swertia chirayita</i>	230
14.1	Introduction	230
14.2	Habitat conservation	230
14.3	Conservation through legalization of wild harvesting	231
14.4	Conservation through re-introduction	232
14.5	Conservation through <i>ex-situ</i> cultivation	233
14.6	<i>Circa-situ</i> conservation	233
14.7	Conservation through seed bank development	234
14.8	Conservation through communication and co-operation	234
