

LIST OF TABLES

Table No.	Particulars	Page
Table 1.1	: Production and export of tea from major tea growing countries.....	10
Table 1.2	: Production, domestic consumption and tea available for export from India.	11
Table 1.3	: Per capita net domestic availability (in kg).....	11
Table 1.4	: Estimated average daily number of labour and total number of labour on role as on 31st December each year in Indian tea plantation.....	12
Table 1.5	: Productivity of Darjeeling for 1951-1995.....	12
Table 1.6	: Estimated average daily number of labour and total number of labour on role as on 31st December each year in Darjeeling tea plantation.....	13
Table 1.7	: Volume, value and share of export of major tea producing countries of the world (volume in thousand metric tons and value in million US dollars).....	14
Table 1.8	: Average yield of major tea growing countries of the world in kg/ha.....	16
Table 1.9	: Annual tea production of the major tea growing countries of world in thousand metric ton and their share in world production.....	17
Table 1.10	: Annual average price of tea of major tea producing countries sold at London Auction (Price in US cents per kg).	18
Table 1.11	: Annual tea production of the different tea growing areas of India in thousand kg and their percentage share on the total production of India.....	19
Table 1.12	: Average yield / ha in kg/ha of different tea growing areas of India.....	20
Table 1.13	: Districtwise average price of Indian tea sold at London auction (in pence/kg)	21
Table 2.1	: Percentage of area under tea bushes of different age group in 1976 and 1996.....	25
Table 2.2	: Yield in kg/ha of some rejuvenation pruned sections of Doom Dooma Tea Co. Ltd.....	30
Table 2.3	: Pay-back period for rejuvenation + infilling	31
Table 2.4	: Pay-back period for replanting	31
Table 3.1	: Actual and national yield of Darjeeling tea in different years.....	46
Table 3.2	: Some characteristic features of the sample gardens.....	55

Table 4.1	:	Growth level of Darjeeling tea industry with respect to number of gardens, cultivated area, production, yield and labour employed.....	61
Table 4.2	:	Amalgamation of different original tea gardens till 1995....	62
Table 4.3	:	Comparative growth trend in respect to Area, Production and Average yield between West Bengal, Assam, Dooars & Terai.....	66
Table 4.4	:	Comparative productivity of Darjeeling vis-a-vis other tea growing areas.....	68
Table 4.5	:	Growth rate (%) in area under tea, production and productivity by area during 1951-1995.....	73
Table 4.6	:	Sub-area wise production trend for Darjeeling tea Garden between 1985-1995.....	74
Table 4.7	:	Area, production and productivity of different gardens for the period from 1981-1995.....	75
Table 4.8	:	Profitability status of Darjeeling Tea Gardens in different years.....	75
Table 4.9	:	Cost of production per kg of made tea in Darjeeling in different years	76
Table 4.10	:	Percentage of different cost heads to total cost of production per kg. of made tea in different years.....	77
Table 5.1	:	Average yield of different sections in different gardens by years in kg/ha	82-83
Table 5.2	:	Average yield of different sections planted in different years for a particular period for the same pruning cycle followed.....	84
Table 5.3	:	Average yield in kg/ha of 15 years (1981-95), year of planting and age of five highest and lowest yielding sections of different gardens.....	85-86
Table 5.4	:	Percentage of vacancy in the highest and lowest yielding sections of Garden A	88
Table 5.5	:	Percentage of vacancy in the highest and lowest yielding sections of gardens H, G, F and B	89
Table 6.1	:	Percentage of literates by police station in Darjeeling Hills	92
Table 6.2	:	Percentage of resident and temporary workers and dependent per resident workers in Darjeeling and at national level.....	96
Table 6.3	:	Productivity of labourer in kg and labour employed per hectare in Darjeeling Tea Industry by years.....	97-98
Table 6.4	:	Difference of requirement of mandays for different operations in a compact section and a section having 15% vacancy	100

Table 7.1	:	Yield of some rejuvenated section of Darjeeling	103-105
Table 7.2	:	Mandays required per hectare for different pruning operations in Darjeeling	105
Table 7.3	:	Mandays required per hectare for infilling a section having 20% vacancy	106
Table 7.4	:	Details of cycle-wise yield of the replanted sections.....	107
Table 7.5	:	Year-wise yield progression of some uprooted and replanted sections	108
Table 7.6	:	Mandays required for uprooting.....	109
Table 7.7	:	Requirement of labour (mandays) per year for replanting.....	109-110
Table 7.8	:	No of mandays required for uprooting & replanting and if not uprooted	110
Table 7.9	:	Waiting period for harvest after different types of pruning/skiffing operations and uprooting and replanting	112
Table 7.10	:	Cost of rejuvenation and infilling per hectare	114
Table 7.11	:	Cost of uprooting and replanting / ha in Darjeeling.....	116
Table 7.12	:	Pay back period for rejuvenation pruning and infilling.....	118
Table 7.13	:	Pay back period for uprooting and replanting	118
Table 7.14	:	Productivity of the tea bushes by their age-group.....	119
Table 7.15	:	Regression parameters of the 3rd degree polynomials using yield as dependent variable	120
