

List of Tables

<u>Sl.No.</u>	<u>Tables</u>	<u>Page no.</u>
1.	I.1 The geology of Rakti River Basin at a glance	6
2.	II.1 The orders & respective drainage parameters	22
3.	II.2 Orders & stream numbers	23
4.	II.3 Orders & stream lengths	25
5.	II.4 Orders & stream gradients	26
6.	II.5 Orders & basin areas	28
7.	II.6 Orders & basin reliefs	29
8.	II.7 Basin area & stream length in respect of orders	30
9.	II.8 Different morphometric attributes with their various categories, midvalues of the categories & relative cumulative frequencies	33
10.	II.9 Different categories of average slope	35
11.	II.10 Different slope categories with respective areas	36
12.	II.11 Different slope categories & respective frequencies	38
13.	II.12 Different categories of relative relief	40
14.	II.13 Different relative relief categories with respective areas	42
15.	II.14 Different relative relief categories with respective frequencies	43
16.	II.15 Different categories of drainage density	46
17.	II.16 Different drainage density categories with respective areas	48
18.	II.17 Different drainage density categories with respective frequencies	49
19.	II.18 Different categories of drainage frequency	51
20.	II.19 Different drainage frequency categories with respective areas	53
21.	II.20 Different drainage frequency categories with respective frequencies	55
22.	II.21 Different categories of source density	57
23.	II.22 Different categories of confluence density	57
24.	II.23 Different source density categories with respective areas	60
25.	II.24 Different confluence density categories with respective areas	60

<u>Sl.No.</u>	<u>Tables</u>	<u>Page No.</u>
26.	II.25 Different source density categories with respective frequencies	61
27.	II.26 Different confluence density categories with respective frequencies	61
28.	II.27 Different categories of dissection index	63
29.	II.28 Different dissection index categories with respective areas	65
30.	II.29 Different dissection index categories with respective frequencies	66
31.	II.30 Different categories of roughness index	68
32.	II.31 Different roughness index categories with respective areas	70
33.	II.32 Different roughness index categories with respective frequencies	70
34.	II.33 Numerical values of linear regression (drainage density & roughness index)	73
35.	II.34 Numerical values of linear regression (relative relief & average slope)	75
36.	II.35 Numerical values of linear regression (relative relief & drainage density)	77
37.	II.36 Numerical values of linear regression (relative relief & dissection index)	79
38.	II.37 Numerical values of linear regression (drainage frequency & source density)	81
39.	II.38 Numerical values of linear regression (drainage frequency & confluence density)	81
40.	II.39 Various aspects of alluvial fan segments	88
41.	II.40 The geomorphic units with their degrees of potentiality for land utilization	91
42.	III.1 Natural vegetation types of Rakti Basin	99
43.	III.2 Forest area in Rakti Basin in different years	106
44.	III.3 Reduction of forest area by different means in Rakti Basin	108
45.	III.4 Illicit felling & associated phenomena in different periods	113
46.	III.5 The comparison between the periodic fluctuations in the number of rainy days of Simulbari Tea Estate & Long View Tea Estate	118

<u>Sl.No.</u>	<u>Tables</u>	<u>Page no.</u>	
47.	III.6	Computed river discharge in different years	121
48.	IV.1	Rainfall depth zones with respective areas	131
49.	IV.2	Rainfall depth zones falling in different categories	131
50.	IV.3	Different statistical parameters of annual & monsoonal rainfall	135
51.	IV.4a	Different zones of annual rainfall variability	136
52.	IV.4b	Different zones of monsoonal rainfall variability	136
53.	IV.5	First order serial correlation (r_1) with confidence limits ($CL(r_1)$)	140
54.	IV.6	Rain-gauge stations with values of variance of induced oscillation	142
55.	V.1	Different aspects of the long-profile	150
56.	V.2	The change of the area of the lower channel courses of Rakti Catchment	155
57.	V.3	Mean monthly discharge of Rakti Basin	157
58.	V.4	Mean monthly discharge & sediment load of Rakti River	159
59.	V.5a	Gauge height of Rakti channel in mt.	160
60.	V.5b	Hydraulic mean depth of Rakti channel in mt.	161
61.	V.5c	Bed height of Rakti channel in mt.	161
62.	V.6	Peak flood discharge & stage of Rakti River in different years	164
63.	V.7	The monthly maximum & minimum discharges (with the range of variations) of Rakti Basin	167
64.	V.8	Peak flood discharge & daily run off with their corresponding sediment loads	169
65.	V.9	Different channel parameters of Rakti River	171
66.	V.10	The rate of scouring & filling of bed area of Rakti trunk stream	172
67.	V.11	The bank erosion in mt. of Rakti River from 1986-1991	173
68.	VI.1	Mean annual rainfall & the R indices of various stations	183
69.	VI.2	Correlation matrix	185
70.	VI.3	Indices of soil erodibility	188

<u>Sl.No.</u>	<u>Tables</u>	<u>Page no.</u>
71.	VI.4 Rating table for the parametric values of C.P factor	192
72.	VI.5 Proposed conservation model for study area	199
73.	VII.1 Morphology of Tindharia Cricket Colony landslide	217
74.	VII.2 Different soil parameters of Tindharia Cricket Colony Landslide	220
75.	VIII.1 The zones of soil moisture at wilting point	237
76.	VIII.2a Various depths of irrigation water required at wilting point	240
77.	VIII.2b The soil moisture percentage at different moisture tentions with the categories of the slopes of moisture curves	240
78.	VIII.3 Assigned rating values of different parameters	241
79.	VIII.4 Different water potent land categories of Rakti Basin	242
80.	VIII.5 Land capability classes & sub-classes with their related criteria	245

LIST OF FIGURES

<u>Sl.No.</u>	<u>Figures</u>
1.	1 - Location map of Rakti River Basin.
2.	I.1 - Geology map of Rakti River Basin.
3.	I.2 - Distribution of different soil pits of Rakti River Basin.
4.	I.3 - Climatic diagrams of Rakti River Basin.
5.	II.1 - Drainage order map of Rakti River Basin.
6.	II.2 - Correlation diagrams of drainage composition.
7.	II.3 - a. Composite profile b. Relationship between stream length & basin area.
8.	II.4 - Different morphometric attributes plotted on arithmetic probability paper.
9.	II.5 - Contour map of Rakti River Basin.
10.	II.6 - Average slope map of Rakti River Basin.
11.	II.7 - Relative relief map of Rakti River Basin.
12.	II.8 - Drainage density map of Rakti River Basin.
13.	II.9 - Drainage frequency map of Rakti River Basin.
14.	II.10 - Source head density map of Rakti River Basin.
15.	II.11 - Confluence point density map of Rakti River Basin.
16.	II.12 - Dissection index map of Rakti River Basin.
17.	II.13 - Roughness index map of Rakti River Basin.
18.	II.14 - Geomorphic units of Rakti River Basin.
19.	II.15 - Transverse profiles showing morphology & landuse of the Geomorphic units.
20.	III.1 - Natural vegetation map of Rakti River Basin.
21.	III.2 - Forest area of Rakti River Basin in 1931.
22.	III.3 - Forest area of Rakti River Basin in 1965.
23.	III.4 - Forest area of Rakti River Basin in 1991.
24.	IV.1 - Rainfall depth zone map of Rakti River Basin.
25.	IV.2 - Annual rainfall variability of Rakti River Basin.
26.	IV.3 - Monsoonal Rainfall variability of Rakti River Basin.
27.	IV.4 - Rainfall trend of Rakti River Basin.
28.	V.1 - Rakti River system in 1931.

<u>Sl.No.</u>	<u>Figures</u>
29.	V.2 - Rakti River system in 1965.
30.	V.3 - Rakti River system in 1991.
31.	V.4 - Long profiles of Rakti, Rohini and Rungsung rivers.
32.	V.5 - Long profile diagrams showing the change of lower courses between 1931 & 1965.
33.	V.6 - Comparative change of the lower (braided) courses between 1931 and 1965 of Rakti River system.
34.	V.7 - Comparative change of the lower (braided) courses between 1965 & 1991 of Rakti River system.
35.	V.8- Comparative change of the lower (braided) courses between 1931 & 1991 of Rakti River system.
36.	V.9 - Mean monthly discharge, stage & bed elevation diagrams.
37.	V.10 - Mean monthly sediment load & discharge rating curve.
38.	V.11 - Mean monthly stage & discharge rating.
39.	V.12 - Peak flood hydrographs, corresponding stage & bed height diagrams.
40.	V.13 - Peak flood run-off & the sediment load relationship diagram.
41.	V.14 - Diagram showing the magnitude-frequency analysis of annual peak flood.
42.	V.15 - Cross sectional area diagrams with water levels in monsoon and non-monsoon periods.
43.	V.16 - Different hydraulic parameters of monsoonal & non-monsoonal periods.
44.	V.17 - Change of the cross sectional areas of consecutive years from 1986-1991.
45.	VI.1 - Rain erosivity (R) map of Rakti River Basin.
46.	VI.2 - Soil erodibility nomograph.
47.	VI.3 - Soil erodibility (K) map of Rakti River Basin.
48.	VI.4 - Topographic erosivity (L.S) map of Rakti River Basin.
49.	VI.5 - Biological erosivity (C.P) map of Rakti River Basin.
50.	VI.6 - Potential soil loss map of Rakti River Basin.
51.	VI.7 - Actual or predicted soil erosion map of Rakti River Basin.

<u>Sl.No.</u>	<u>Figures</u>
52.	VI.8 - Soil conservation scheme map of Rakti River Basin.
53.	VII.1 - Landslide map of Rakti River Basin.
54.	VII.2 - Landslide susceptibility zones of Rakti River Basin.
55.	VII.3 - Slide cum subsidence map of Tincharia Cricket Colony.
56.	VIII.1 - Soil water retention at wilting point (-15 bar tention).
57.	VIII.2 - Slope curves of soil moisture retention.
58.	VIII.3 - Soil water potentiality map of Rakti River Basin.
59.	VIII.4 - Land capability map of Rakti River Basin.
60.	VIII.5 - Landuse map of Rakti River Basin.

LIST OF PHOTOGRAPHS

<u>Sl. No.</u>	<u>Photographs</u>
1	I.1 - Coal seam at Pankhabari : stealing of coal forming underground tunnel often helps in the subsidence of the upper surface.
2	II.1 - Braided course of Rakti at the foot hills due to the fall of the gradient.
3	II.2 - Apex of alluvial fan with highly deforested slopes at Marchebong
4	III.1 - Growing military settlements at the cost of forests at Khaprail.
5	III.2 - Depleted forests at Madhuban on the east bank of Rohini Khola.
6	III.3 - Illicit felling in Rakti Forest.
7	III.4 - Illicit felling by the local inhabitants for the purpose of fuel.
8	V.1 - Braided channel of Rakti at the confluence with parent river Balasan.
9	V.2 - Meandering work of Rakti channel with point-bar deposition.
10	V.3 - Lateral erosion of river Rakti affecting the Tea-Gardens. Note the stratification of the soil.
11	V.4 - Steeply eroded convex side of the meandering channel of Rakti.
12	V.5 - Highly caving bank of Rakti River in 1991 flood.
13	V.6 - Bank-Protection work near Six-miles busti along Rakti River.
14	VII.1 - Talus creep affecting vegetation.
15	VII.2 - Sheet-slide along a steep slope at Gouri-Gaon near Tindharia.
16	VII.3 - Soil creep along Rakti River Bank at Bamanpokhri.
17	VII.4 - Debris slide near Tindharia causing the adjoining house to subside.

<u>Sl.No.</u>	<u>Photographs</u>
18	VII.5 - Occurrence of subsidence due to slope failure.
19	VII.6 - Tindharia Cricket Colony landslide due to the removal of the basal support by the extraction of coal.
20	VIII.1 - Stony soil below Marchebong.
21	VIII.2 - Unscientific terracing on hill-slope at Marchebong.
