

ACKNOWLEDGEMENTS

I wish to thank my teacher, Prof. Dr. G.S.S. Murthi, Professor of Chemistry, North Bengal University for suggesting the problem and providing me with laboratory facilities. I am grateful for his constant encouragement and many a stimulating discussion.

As there were no modern instrumental facilities like PMR, 13-C NMR, and Mass in our laboratory, I had to depend on outside help for these facilities. I am very much grateful to Prof. ~~Pekalo~~ Camps Of Barcelona Univesity, Spain, for his help in recording these spectra. I am also thankful to the RSIC, CDRI, Lucknow for some spectra recorded in the thesis. I am also highly grateful to Dr. A. K Majumder , University of North Bengal, who recorded the IR spectra and Mr. Sanjoy Das, IICT, Hyderabad who also recorded some PMR spectra.

Thanks are also due to Dr. B. Basu, Lecturer in Chemistry for some helpful discussions. I am very much grateful to Dr. Debesh Dev, Reader in Zoology, University of North Bengal and Dr. Pranabesh Roy, Reader and Head of the

Department of Zoology, Siliguri College in helping me with the biological studies. My work would not have been possible without a fellowship from the University Grants Commission, New Delhi and I am indebted to the commission for the same.

It is my pleasure to acknowledge my appreciation to Mr. Abdul Matin for his encouragement.

Finally, the author likes to express his deep sense of gratitude to his parents and family members for their constant encouragement and inspiration.

Department of Chemistry,
University of North Bengal
Darjeeling, India.
1993.
